About Us....

About Atlantic Photo Supply...

Atlantic Photo Supply was founded in 1942 and is the only professional printing lab in Atlantic Canada. We serve professional photographers from all over our region as well as a large and loyal consumer base for all their photographic printing and camera needs. Atlantic Photo Supply is proud to be part of the national buying group, Foto Source, representing more than 175 stores across Canada. Foto Source allows us to offer you competitive pricing while remaining independently owned and operated.

In 2012 Atlantic Photo Supply went through a major expansion with the opening of a brand new retail store in downtown Halifax, while at the same time building a new production facility and retail store in the Burnside Industrial Park in Dartmouth.

Our lab provides a broad range of product offerings on both traditional photographic silver halide paper as well as canvas and fine art media, digital restoration and/or manipulation, mounting and laminating and print finishing. Our new sublimation lab gives our customers the ability to have their images printed on everything from coffee mugs and water bottles to aluminum and slate.

Our customers are offered a number of choices to transmit images to us for printing, depending on their needs and requirements. From our consumer based Foto Factory and Foto Express on-line printing platforms to our professional platforms, WorkStream and ROES, we have a printing solution that easily and effectively allows our customers to create amazing photo products and upload them with the click of a button.

Atlantic Photo Supply also offers a great selection of cameras and related products from Canon, Nikon, Fuji, Leica and many others. We have a wide variety of photo accessories from lenses to tripods, lighting equipment and frames and albums. We are the largest telescope dealer in Atlantic Canada with a large number of scopes from Celestron and SkyWatcher stocked and on display.

Atlantic Photo Supply continues to search for new and innovative products and services that allow us to stay at the leading edge of our industry and will deliver them with the on-going commitment to our core values of service and quality.

Lab Services

Luster Prints

Our standard digital prints are produced in our lab with the greatest care taken in calibration and balancing of our equipment. The paper is Fuji Crystal Archive Super PD Luster , a silver halide paper that has a wider colour gamut and thus gives a wider tonal range. Our process also ensures that your prints are as archival as possible, adding to the value of your image by allowing it to last for future generations to enjoy. At APS we take the final quality of the latent image seriously, thus our colour management procedures are the backbone of the quality our customers have come to expect and deserve.

Turn-around: 48 hours (Times may vary during peak seasons.)

Available on Luster and Glossy (5" and10" paper only) finish through our online ordering system, CD, Flash Memory cards and USB drives.

Pearl/Metallic Prints

Choose Pearl/Metallic for highly saturated, vivid colour!

Fuji Pearl paper is sometimes called metallic, and is truly a paper that can make images with rich colours “pop”, giving a vivid reproduction of any subject. It is a glossy paper that has an almost chromogenic look.

For those who don’t want a glossy finish we recommend you mount the print on our smooth mount board and laminate it with our classic leather finish.

Turn-around: Printed on Tuesdays
(Please allow additional turn-around time if image is being mounted and laminated.)

High Res Scanning

From scanning, right through to the final print, we're dedicated to producing the best possible scans and reproductions of your artwork.

Our high resolution professional scanner will capture every detail of your film, transparency or print original.

Scan sizes and costs are based on **300 dpi, 8 bit colour** and include basic colour correction and dust clean-up.
Scan requests for higher dpi (i.e 600 dpi) will cost more.

Burning, dodging, repairs of scratches, excessive dirt, dust or negative damage and specific colour matching are subject to extra digital retouching fees, by quotation.
Turn-around: 7-10 Business Days

Wall Art Decal

Great for wall murals, wallpaper, booth displays, fine art, indoor/outdoor signage and more!

This material can be applied to almost any surface and remain adhered for either short or long term use. It can be re-used as many times as you want, withouth any loss of tack. Resists shrinking, curling, ripping and wrinkling. And...it won't leave a sticky residue on the wall after removal!
(*For increased longevity, we recommend lamination. See page 17 for pricing.*)

William Turner Prints

These textured fine art prints bring another dimension to your image.

Our fine art giclees are printed with archival ultrachrome inks on archival grade, 310 gsm², acid-free hand-molded 100% cotton rag paper. Images are printed with 1/2" border to allow for hinging to a matte when framing.

Canvas Prints

Our museum grade canvas is OBA and acid free, 450 gsm, 19 ml archival, bright white canvas medium that is suitable for both photographic and art reproduction.

Prints are varnished with a non-yellowing, waterproof medium to preserve, protect and enhance your image.

Stretched canvas prints are available with both ¾" (Regular) and 2" (Gallery) stretcher bars.

Note: Canvas is a natural fiber and may have irregular bumps or weave for which we are not responsible.

Turn-around: 10 Business Days

When ordering canvas through Workstream, specify in the order notes if you're ordering RC (Regular) or GC (Gallery) Canvas.

1" Regular Stretch
2" Gallery Stretch

2" Gallery Stretch
(with Black Borders)

2" Gallery Stretch
(with Image Wrap)

Canvas Print Pricing

Note: Image Wrapped Canvas requires a much looser crop than normal.
(When ordering through Workstream, choose “Custom Size”.)

Regular Stretch

1. Add 2.25 inches to each dimension in your crop.
(ie.16 x 20 would become 18.25 x 22.25)

Gallery Stretch

1. Add 4.25 inches to each dimension in your crop.
(ie.16 x 20 would become 20.25 x 24.25)

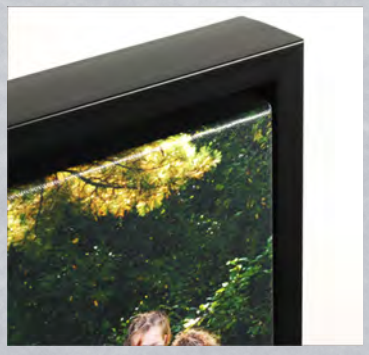
Floater Frames

Complete your stretched canvas prints with our floating frames.

These frames make your canvas print appear suspended, separating the canvas from the moulding for a truly complete presentation. Floater framed prints come ready to hang. *Available in Black only)*



Floater Frames Pricing

Note: Floater Frames require two additional united inches to allow for the space between the frame and canvas.

For UI Use 10000 x UI @ UI value... (i.e. 10000 x 88 @ 2.56 each).

Framed Fine Art Prints

Perfect turnkey, one-stop shopping solution to put the finishing touches on your walls.
Prices include print, finishing and framing.

Stunning, photographic print quality...
This is our smooth fine art paper ideal for fine art reproduction and photo printing.
It's bright white colour is perfect for high contrast and black and white images (8 ml/230gsm weight). Prints are mounted on acid free smooth mount board and laminated with our popular leather laminate to eliminate the need for glass. High quality frames include a white liner to accent and present a professional look. We have 3 frame options that will match modern or traditional decor.

(Prices INCLUDE print, mounting, laminating and frame!)

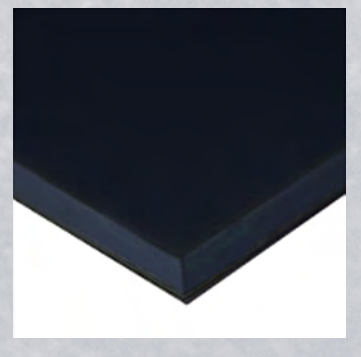
Print Finishing

Mounting & Lamination

Enhance, Preserve and Protect Your Images…

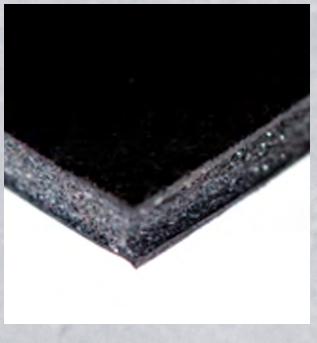
Add a professionally finished look to your prints with our variety of mounting materials and protective laminates. Photo prints that are larger than 11 x 14 and intended for framing under glass should be mounted and laminated. In an environment with excessive heat and humidity, a large unmounted print can expand and contract over time causing it to ripple and sag, or even worse, stick to the glass it's framed under. When framing without glass, the laminate shields the print from moisture and dirt. Laminated prints can be easily cleaned with a soft, damp cloth. **Turn-around: 48 hours**

MOUNTING...



SMOOTH MOUNT

1/16'' black board. Completely smooth surface! Smooth Mount is best suited for gloss prints or when your frame requires a thinner mount board.



FOAMCORE

3/16'' black foamcore board. Due to its light weight, foamcore is best suited for large prints that will be framed.

LAMINATION...

PEARL

Pearl is best suited for photographic quality images that will be viewed indoors under direct lighting conditions.

LEATHER

Our most popular laminate! It will not alter the color or sharpness of the original print. The most common application for leather lamination is portrait photography.

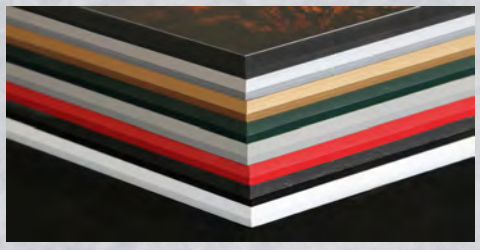
(Larger sizes available by quote)



Plaquemounting is a popular and economic alternative to framing that looks good and lasts! This is a great option for photos, certificates/ awards, posters, newspaper clippings, and any other paper-based media.

Images are mounted on 3/8" hardboard, cut to the exact size of your artwork. The edges are beveled and the surface is laminated, which seals and protects your piece from wrinkling, staining, or mildewing. The surface is washable, and the edges are available in a variety of colors (black, white, red, green, blue, brown, grey, silver, and gold).

Turn-around: 2-3 Weeks
