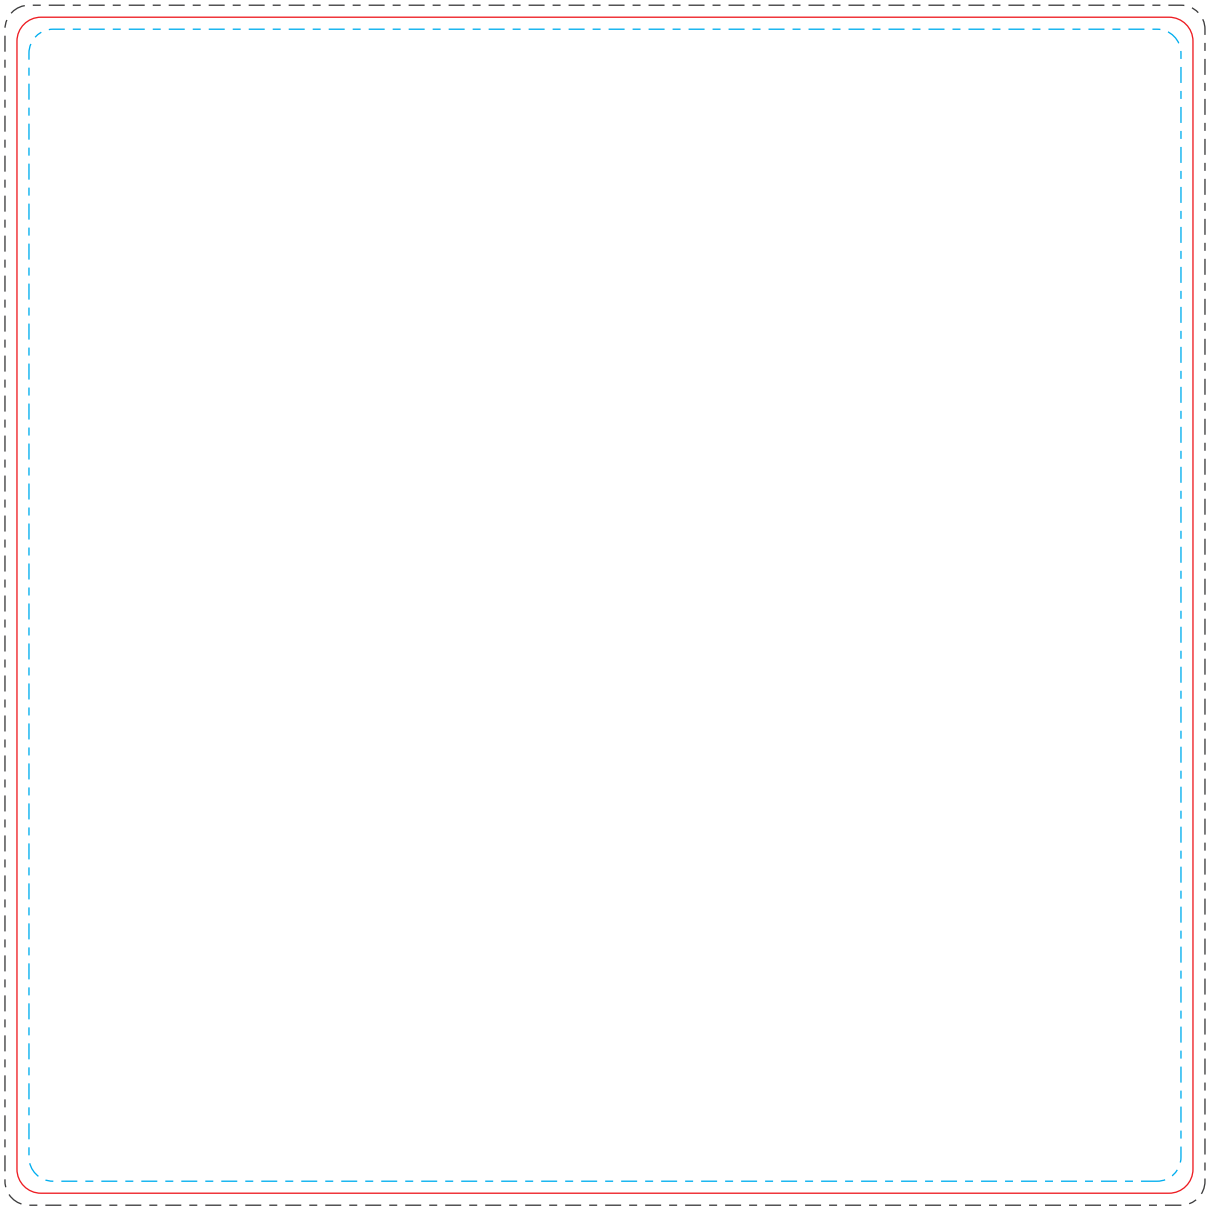
For a standard 2.5 gallon container, the optimal pressure sensitive and 2-Ply label size is 6.125" x 6.125"

1. Drag and drop your artwork onto the artboard.

2. If your design has colors/images/shapes that are meant to go to the edge of the label, make sure they extend out 1/16" past the dieline to the bleedline.

3. Keep required elements (text, images, borders, etc.) 1/16" inside the dieline to the safeline.

4. Convert to vector outline.

5. Export your artwork at a minimum of 300 dpi, ideally at 600 dpi.


Label Panel	7.5" x 7.5"
Bleedline	6.25" x 6.25"
Dieline	6.125" x 6.125"
Safeline	6" x 6"
