Fabric you can **clean with just water.**

Safe Front® Technology

Aquaclean® Safe Front® technology protects against viruses and bacteria, effectively reducing their activity and limiting their penetration into the fabric.
The join formula has been totally effective after multiple washes and years of use.

Safe Front® is a powerful permanent barrier against external agents that is applied as standard in the fabric manufacturing proces, so there is no need for external disinfecting or sanitizing agents.

Intended for you and your pet

With Aquaclean Extreme fabrics, you can enjoy your sofa and your pet any time, because this fabric incorporates a protective layer developed with innovative technology that acts as a flexible, elastic barrier to block fabric loops and prevent accidental snagging.

Water cleaning in three simple steps:

1. Remove any excess residue on the upholstery by careful scraping of the stain surface. (Make sure not to use a sharp object to prevent ripping the fabric).
2. Apply water over the stain, either directly or using a damp cloth. Wait a few seconds.
3. Press down over the stain with a damp cloth and rub gently over the fabric in circular movements. If the stain does not come off completely, repeat the process as required.
