

Data Analyst (Full-Time/Remote, U.S.)

Do you want to use your skills to fight climate change and positively impact the communities we live in? OhmConnect, a leader in consumer energy services, is seeking a motivated and talented Data Analyst to join our team in creating innovative solutions that reimagine how people use energy.

Who we are

We were created to improve the lives of people and the health of the planet by reimagining the way we use energy. We are tackling such a grand challenge by solving massive inefficiencies in energy markets, changing how people use and view energy, and connecting smart homes with the smart grid. At OhmConnect, we build products that connect deeply with the consumers and invite them to take action to positively impact the planet, people, and pocketbooks.

We are an Equal Opportunity employer striving to create a diverse, equitable, and inclusive work environment where everyone feels that they have a voice that is heard.

What we do

Our products encompass:

- Consumer-facing applications that use home automation control and user behavior modeling to shape consumer energy consumption.
- Integrations with a growing set of devices and appliances - smart plugs, thermostats, chargers, etc.
- Smart Meter data ingestion and analysis for consumer consumption forecast.
- Bidding, monitoring and settlement processes for the energy markets.

What you will do

- Perform high throughput analytics using SQL.
- Transform data into actionable insights for various constituents within OhmConnect.
- Manage and curate analytical dashboards to provide the primary data inputs into the company.
- Develop meaningful aggregates and single sources of truth.

- Work closely with and bring your "data hat" to Product, Engineering, and business teams to ensure that decisions are made using accurate data, not assumptions.
- Establish and track KPIs for product features and business initiatives, including A/B testing, conversion rates, and feature experimentation.
- Monitor analytics and metrics results.

What you bring

- Excellent data analysis skills built on at least 4 years of relevant experience.
- Excellent communication skills with a proven ability to tailor presentations and reports to the requirements and needs of the audience.
- Excellent people skills with a proven ability to work collaboratively across varied teams.
- Strong SQL skills and familiarity with one or more columnar databases such as Redshift, BigQuery, Vertica.
- Real world experience with BI and visualization tools such as Periscope/SiSense, Looker, Tableau.
- Fluency in a statistical programming language or package, with emphasis on Python or R.
- Experience with experimentation frameworks, A/B testing, analytics.
- Experience with data cleansing and preparation.
- Expert listening and problem-solving skills.
- Desire and willingness to learn and proven ability to apply learning to work output.
- Demonstrated ability to thrive in fun and fast-paced environments.
- Desire for a career that makes an impact.

What we offer

- 100% remote work. We are a "work-from-anywhere" business with regular retreats with the team (travel and accommodations covered).
- A benefits package that includes the full range of wellness benefits, a home office set-up stipend, stock options, and more.
- Unlimited PTO and paid parental leave.
- A company commitment to fostering work-life balance and living our values.

How to apply

Please submit resume and brief cover letter to recruiting@ohmconnect.com
