About Us

Jet Access is the first vertically integrated, fully transparent full-service aviation management company in the industry. At a national scale, Jet Access conducts part-135 charter, part-91 management, FBO management, international brokerage, part-145 repair stations, and part 61&141 flight training with collegiate and privately financed programs.

Our team consists of highly experienced, qualified, knowledgeable, and results-oriented professionals. We create tangible value for each aviation vertical we manage – it's what makes us a genuine full-service provider. It's what allows us to provide value to our clients beyond cutting costs and streamlining operations.

Flight Training

Jet Access Flight Training (JAFT) is a one-source flight school for all training needs from complete accelerated commercial programs, aviation degrees, private pay-as-you go training, and rentals.

JAFT's accelerated "zero-to-hero" privately financed program can be accomplished in about 7-months, including multi-engine and instructor ratings. Student's can finance housing, testing fees, supplies, and extra finances on account. Jet Access provides the highest quality program while using modern technically advanced aircraft and including about 70 more actual aircraft flight hours than competitors, while lower cost than industry average.

Jet Access has four collegiate partners, including Liberty University and Purdue University Global at all JAFT locations; with our collegiate partners, we provide aviation bachelor's degrees, commercial single and muti-engine, and instructor ratings in only about a 2-year period with online classes.

"Zero-to-hero" students can also enroll in Purdue University Global (with a 20% tuition discount) upon earning their Private Pilot Certificate, continue their training while conducting online classes with Purdue, earn an instructor position with Jet Access, and while building their 1,500 hours they earn their degree. Zero to 1,500 hours, with a degree, in about 2 to 3 years!

JAFT students are eligible to earn positions as flight instructors. After instructors build experience, they can then become charter pilots for Jet Access (10th largest charter in the world) while earning high-salaries, benefits, and phenomenal lifestyle, approximately 10 years faster than an airline career's comparable pay and lifestyle. Because Jet Access is the only national scale vertically integrated aviation enterprise, our pilots see far better job security and quality of life than industry norms. All our students are eligible for airline flow through programs as well and are not limited to a part 135 charter pilot career.
