I'm not robot

Updraft worksheet

The UpdraftPlus Backup & Migration Plugin is a trusted solution within the WordPress community, responsible for backing up, restoring, and migrating WordPress websites worldwide. With over 3 million active installations, this plugin has earned its reputation as the world's highest-ranking and most popular scheduled backup and migration solution. Backup with UpdraftPlus UpdraftPlus provides flexible backup options to your preferred storage location and allows for effortless restoration in just three clicks. You can store backups on Dropbox, Google Drive, Amazon S3 (or compatible), Rackspace Cloud, FTP, DreamObjects, Openstack Swift, or email. The paid version offers additional remote storage locations such as Microsoft OneDrive, Microsoft Azure, Google Cloud, Backblaze B2, SFTP, SCP, pCloud, WebDAV, and UpdraftVault. Backup manually or schedule backups to run every 2, 4, 8, or 12 hours, daily, weekly, monthly, or fortnightly. Restore with UpdraftPlus Your WordPress website is vulnerable. Your site may get hacked, or something could go wrong during an update or server crash. To reverse changes made by human error or mistakes caused by updates, you can restore your WordPress website in just a few clicks with UpdraftPlus. Choose which components to restore (e.g., plugins, themes, database) and click again to restore. Migrate with UpdraftPlus UpdraftPlus makes it easy to migrate your WordPress website to another web host, server, or domain. To migrate, simply download your database, plugins, and themes from the source site, then upload them into your destination site. The built-in search-and-replace engine identifies old strings and replaces them to reflect the new location. Why UpdraftPlus? Writing a reliable backup and migration plugin that works consistently across millions of different WordPress deployments is challenging. UpdraftPlus has earned its reputation by being trusted and actively deployed on more websites worldwide than any other WordPress backup and migration plugin. UpdraftPlus Premium offers advanced features like automatic backups, detailed reports, and cryptographic checksums for verifying backup integrity. It also provides premium migration, multisite/multi-network compatibility, database encryption, and WP-CLI management. The plugin supports backing up non-WP files and databases, including e-commerce store tables or custom WordPress core modifications. UpdraftPlus Premium is available for purchase, and managing multiple websites can be streamlined with the UpdraftCentral remote control dashboard. This allows centralizing backups, updates, users, pages, posts, plugins, and themes management. The full suite of Team Updraft's plugins includes Backup, migrate, and restore capabilities, rated 5* on the plugin directory and trusted by over 3 million WordPress website owners. Other available plugins offer database cleaning, image compression, caching, security features, SEO improvements, and update control.
