Washes: 4 Sanitize Option Delay Start To sanitize your dishes and glassware, select the SANITIZE option from the DELAY START menu. Delay Start Option: When selected, the light above the pad will come on delay starting your dishwasher from 2-4 or 2-4-6 hours on and remain on until end of cycle. Preparation and Loading Dishes Long-handled knives and utensils can be placed in top Dish Preparation rack. Scrape away large pieces of food, bones, pits, toothpicks, etc. The continuous filtered wash system will remove remaining food particles. Preparing and Loading Dishes For 10 place setting: Place settings are arranged from the center. Utensil holder is on left side. 12 place setting: Plates and glasses are in lower rack. Cookware is in upper rack. Loading the Bottom Rack The bottom rack is best for plates, saucers, bowls, and cookware. Page 10 Silverware Basket When covers are up, mix items in each section of the basket with some pointing up and some down to avoid nesting. Water spray cannot reach nested items. Cut Injury Load sharp items (knives, skewers, etc.) pointing down. Dishwasher Dispenser & Detergents Filling the Detergent Dispenser The amount of detergent to use depends on the water hardness. Water hardness is measured in grains per one prewash cup. The detergent dispenser has one main wash cup and hardness. Water hardness is measured in grains per one prewash cup. Rinse Aid Factors Affecting Performance Rinse aid greatly improves drying and reduces water spots and filming. Water "sheets" off dishes Hot water line to dishwasher must provide water rather than forming water droplets that cling and leave pressure between 20 and 120 psi. Care & Cleaning Care of Drain Air Gap If a drain air gap was installed for your built-in dishwasher, check to make sure it is clean so the Burn Hazard dishwasher will drain properly. A drain air gap is usually mounted on countertop and can be inspected by before cleaning the interior. Solutionsto Common Dishwashing Problems Check to see that proper amount of detergent is being used for cycle selected. Also, check phosphate level. 29-30 Safety Instructions 20 Care and Cleaning 31 Before Using Your Dishwasher 21 Common Laundry Problems Solved Characteristics of the Dishwasher 32-34 Operating Instructions 23-25 Safety Messages Contractual Protection Safety of the Dishwasher Our safety and your safety are very important. Page 28 Preparation and Loading of the Dishwasher How to Load the Utensil Holder Place utensils in all sections or just one, depending on your load. Cutlery When the cutlery is facing upwards, mix articles (knives, skewers, etc.) with sharp edges in each section of the holder, with points pointing downwards. Distributors Detergents La cantidad de detergente que se debe usar depende de la dureza del agua. Un distribuidor de detergente tiene una taza cubierta y una descubierta para medir el agua. El agente de enjuague mejora la secado, reduce las manchas y la película, pero es importante controlar la presión de agua. Para evitar problemas comunes del lavado de vajillas, debemos cuidar el espacio de aire de drenaje, revisarlo periódicamente para asegurarnos que el elemento calefactor esté limpio. Algunas soluciones para problemas comunes incluyen verificar la dureza del agua, usar detergente fresco deseffado, evitar manchas como café y té, y no lavar grandes cantidades de artículos con comida.
