

40' SEA CONTAINER KITCHEN

Our 40' container kitchen provides a compact event or remodeling solution with high throughput capability, and contains an array of industrial culinary equipment, walk-in refrigeration, prep and service equipment onboard. It features one convection and two standard ovens, a flattop griddle, char broiler, deep fryer, sandwich cooler, and service windows. The container kitchen provides the functionality and volume capability of several standard food trucks, and is best deployed or positioned for multi-day assignments and missions.
