- **Revenues** at 30 June 2019 amount to € 21.6 million compared to € 18.4 million at 30 June 2018, showing an increase of around 17%. The value of production also rose from € 21.3 million to € 25.1 million at 30 June 2019, with an increase of around 18%.
- **EBITDA**, amounted to € 2.0 million compared to € 1.7 million in the first half of 2018, showing a significant increase of around 21%
- **EBITDA margin** at 9.5% compared to 9.2%. These are the results of the marginality consolidation resulting from the containment of fixed costs, synergies and economies of scale generated with the acquisition of Studio Roscini, which allowed to improve the profitability more than proportionally.
- Depreciation, provisions and write-downs remained in line with those of the previous year.
- **Net income for the period** at € 1.2 million compared to € 1.1 million at 30 June 2018, showing an increase of 17% despite a greater weight of current taxation.

Revenues Breakdown

(€ 000)	H1 2019	H1 2018 Pro-forma	%
Italy	3,029	4,332	-30%
EU	18,366	13,725	34%
Extra-EU	125	265	-53%
Other Revenues	33	124	-73%
Total	21,554	18,446	17%

Geographic footprint

The geographical breakdown of sales shows a further increase in foreign sales. Italy's revenue share has decreased from 24% to 14%. This is also due to the increase in revenues from the abroad production of Spello, very concentrated in Italy in the first half of 2018.

- The amount of **fixed assets**, € 2.8 million, increased 53% compared to € 1.8 million at December 31, 2018. The investments concerned intangible and tangible fixed assets related to operating activities, the listing process and the purchase of the Modalis Srl business unit. In more detail, the sum of the acquisitions for intangible assets amounted to € 0.7 million, while that for tangible assets was € 0.2 million.
- **Working capital** of € 16.2 million is improving compared to € 8.6 million at 31 December 2018, essentially due to the dynamics linked to the seasonality of production and sales that characterizes Pattern, therefore a structural part of the business. That also explains the high level of the warehouse, equal to € 8.7 million, against the € 3.3 million recorded at 31 December 2018, as well as the receivables from customers, amounting to € 6.4 million against € 3.9 million at December 31, 2018, and trade payables, up to € 12.7 million compared to € 4.4 million at December 31, 2018. The item "other payables" is instead increasing, from € 2.2 million to € 3.2 million, mainly due to the taxes for the period
- The trend in working capital did not have an impact on **net invested capital**, which actually decreased from € 3 million to € 2.3 million. This figure means that there was no cash absorption, despite the increase in volumes and a distribution of almost € 1.8 million.
- The **net financial position** improved slightly from positive € 3.9 million at December 31, 2018 to positive € 4.1 million at June 30, 2019.
