

## **PORT OF SANDNES**

### **GUIDELINES FOR WASTE MANAGEMENT**

#### **Pollution Prevention**

Based on the MARPOL regulation 73/78 and the European and Norwegian legislation for the prevention of pollution from ships, Port of Sandnes has decided the following guidelines for waste delivery when ships are calling in Port of Sandnes.

The Port is situated close to living- and recreational areas. In order to keep the port and the surrounding area clean and free from waste it is vital that all ships respect these guidelines. These will also ensure an effective waste management within the Port.

#### **Notification form**

As a part of the Call Notification a separate Notification of Ship-Generated waste must be sent to the port at least 24 hrs prior to arrival through Safe Sea Net. Use e-mail: [post@sandneshavneterminal.no](mailto:post@sandneshavneterminal.no)

Please call the port office at (+47) 51 60 89 90 if there is any questions regarding this.

#### **Waste disposal**

All the waste must be handed over to the linesmen while arriving or leaving the port. The amount and type of waste must be in accordance with the Notification form, otherwise the waste may be refused by the Port or there might be an additional cost to pay for which the Shipowner/Agent will be held responsible.

Sewage, ballast water and other waste in bulk are collected by vacuum loaders provided by the Ports waste contractor. In order to have the necessary capacity and type of equipment it is vital that these sorts of waste are notified as soon as possible before arrival and no later than 24 hrs before ETA.

If need there is an urgent need to deliver waste please contact the port office or the 24 hour phone for linesmen/dockers: **92 88 12 19**. Please observe that there will be an additional fee if waste removal is ordered outside opening hours 0730 -1530.

#### **Hazardous waste**

A declaration of the hazardous waste content must be completed and signed by the shipowner. The form may be found on our website [www.sandneshavn.no](http://www.sandneshavn.no)

### **Waste fee**

The port of Sandnes has a “no special fee” which means that all ships are paying a waste fee which covers normal amounts and type of ship generated waste in the port. There will be additional fees if larger amounts or special waste is to be delivered, please contact the port office for more information.

### **Non-Conformity**

If the users are not satisfied with the waste management system please fill in a non-conformity report which we will assist in completing. The port will then report back within 3 weeks how this is dealt with. If this answer is not satisfactory there is a possibility to complain to the official authority, Fylkesmannen i Rogaland. In such a case contact the port if help is needed.

If you have any questions regarding waste disposal please contact us:
