FOCUS ON METAL

Printed In Store!

METAL PRINTS ARE AMAZING!

Heat infuses ink into a specially coated aluminum sheet.

The amazing result is a surface like glass, looking sleek and vibrant. Metal prints are long lasting with superior color brilliance and color longevity.

They are also lightweight, making them easy to mount.

Metal prints are totally resistant to humidity and water, and will not rust. The coating is extremely hard and more scratch resistant than any other printing technology. They do not need to be protected by glass and can be cleaned with any non-abrasive cleaning fluid, even strong disinfectants.
