

UNIQUE LOOK
EXEPTIONAL
PERFORMANCE

PREMIUM

The TAGIT Premium System is manufactured using high quality hollowed-out acrylic material. It has a translucent & glittery look, being highly resistant to wearing. Using its patented 3D detection and an installation distance of up to 110cm it produces high level detection in all three label orientations. The installation distance depends on the configuration and the on site electrical noise level. Designed for exit protection of the global high-end cosmetic stores, libraries, archives, book stores and pharmacies exported across the world.
