

STRAIT Bolsters Institutional Platform with PFA Solutions FirmView®

DALLAS, NOVEMBER 20, 2020 – STRAIT Fund Services (STRAIT), a fund solutions company providing a full range of services to private equity funds, hedge funds, family offices, and other alternative investment firms, announced that it, in conjunction with PFA Solutions, is developing STRAITView, a manager-facing dashboard solution built on the PFA Solutions FirmView® platform. PFA Solutions is a leading provider of alternative investment technology and services that help investment managers aggregate and analyze investment data through the PFA Solutions FirmView® product suite.

STRAITView will provide clients enhanced data transparency and reporting to analyze portfolio performance, compare their fund performance against industry benchmarks, and generate detailed on-demand reports via a dynamic, cloud-based portal and sleek mobile application. The implementation of STRAITView will enable investment managers to organize their vital fund, investor, and portfolio level data within a robust, customizable dashboard delivering technology-driven transparency. STRAITView will integrate seamlessly with FIS Investran, bolstering our institutional platform and creating efficiencies that help fund managers gain immediate visibility into the information needed to make informed decisions.

"As a trusted partner to our clients and their investors, we are constantly investing in technology solutions to ensure best-in-class scalability, performance, and transparency," shared Stacey J. Relton, Managing Partner at STRAIT. Over the past year, STRAIT has made significant investments in client-facing technology, arming investment managers with the tools they need to optimize their operations. Regulatory and investor pressures have made timely data accessibility necessary so fund managers can provide the information and reporting stakeholders require. PFA Solutions' robust software combined with its experience integrating with Investran made the firm a natural choice. The STRAITView platform will augment STRAIT's comprehensive service solution, providing investment managers with real-time access to their performance data and expedited reporting on both the fund and investor levels. Investment managers will easily be able to generate reports that institutional investors seek, instilling confidence in fund performance as well as their choice of service providers.

"We are pleased to be supporting STRAIT's strategy of providing technology-driven transparency to its clients. Our platform offers tracking and reporting for fund, investor, and investment performance, providing a deeper overview of data for fund managers and institutional investors. STRAIT's clients will be able to generate more accurate insights to aid in making informed decisions," said Richard Change, Co-Founder of PFA Solutions.

STRAIT

ABOUT STRAIT

STRAIT is a leading global fund services provider to the alternative investment industry, providing comprehensive middle- and back-office services on an institutional platform utilizing best-in-class technology. The firm partners with emerging managers and global asset management firms, providing the same high touch service and expertise across the spectrum of security types and fund structures.
