CamCheck by Cambrette Care

Supporting confidence, independence and peace of mind.

Would you feel reassured if a qualified carer could pop in and visit you or a loved one? We provide confidence, independence and peace of mind with our new cost-effective, short visit service.

CamCheck is designed for people who do not yet need full-time care, but would benefit from regular visits to assist with medication, and ensure all is well. Our team can also prepare a light meal or snack, or carry out small domestic tasks. We are there to check that clients are comfortable and their environment is safe.

CamCheck staff all complete mandatory training and are there to support independence. All our care staff undergo our safe vetting procedure and training programme and are supervised by our care managers. We have a care manager on call at all times so if a carer needs extra advice, they can easily contact them during a visit. A care manager will also visit every three months to ensure the service is meeting your needs.

CamCheck has a range of packages available, but require that you book a minimum of three visits per week. Each visit is up to 20mins in length. Visits are seven days a week, and can be in the morning, afternoon or evening.

CamCheck is for people who are independent with their personal hygiene care. If you need more support than this, our primary service CamCare is available, and we would be happy to discuss that with you. Our aim is always to ensure that our clients remain as confident and independent as possible, for as long as possible.
