

Classworks® Shows Tremendous Impact in One Semester

STUDY BACKGROUND

Study period: Fall 2019 to Winter 2020

Students evaluated (math): 28,682

Students evaluated (reading): 35,952

School districts: 44

Grades evaluated: 1 - 8

Students represent diverse populations

Classworks Quickly Impacts Student Growth

In a recent study, students using Classworks experienced substantial growth in BOTH reading and mathematics in grades 1-8. The Classworks study examined the impact of Classworks tiered intervention program on Renaissance® Star Reading and Math Assessment scores from fall 2019 to winter 2020. In just one short semester, students using Classworks experienced tremendous growth!

Classworks Users Outperform their Peers

Students who used Classworks averaged 15% more growth on the Star Math assessment than students who did not use the program—across all grades! In addition, Classworks students averaged 9% more growth on the Star Reading assessment than non-Classworks users.

Combatting the COVID Slide

Students in grades 3-5 who used Classworks experienced an average of 11% more growth from fall to winter on their Renaissance Star Math assessment than their peers. This is particularly important in light of the recent NWEA® research on the impact of school closures on student achievement. The research reveals that, particularly for math in grades 3-5, students are projected to lose anywhere from half to all of their academic growth from the last year, compared to normal student growth. Classworks helps students catch up quickly and accelerates their path to grade-level proficiency.

Higher Mastery Leads to Double the Growth!

Classworks recommends a goal of 80% mastery on assignments to maximize the growth for students. The proof is in the data! Classworks students who averaged an 80% or higher on activities averaged 26% more growth on the Star Math assessment and 23% more growth on the Star Reading assessment across all grades. That's why Classworks professional learning focuses on using real-time data to make instructional adjustments that help students achieve higher mastery!

About the study

The purpose of this study was to analyze the impact of Classworks instruction on students who took the Renaissance Star Reading® and Math® assessments. Star assessments provide benchmarks which indicate the minimum performance levels required in order to meet end-of-year goals. The results demonstrate the significant positive effect of Classworks individualized intervention on student growth.
