SPECIFICATIONS

An efficient vacuum flush system hides and quickly evacuates the waste, while simultaneously drawing 20 gallons of air, helping to ventilate the unit for superior odor control. Separate air conditioning units cool the private stalls, located on the roof directly above each private room, and LED lighting creates a bright, modern aesthetic while conserving energy.

The vehicle structure features aluminum framing, composite sub-layers and seamless outer layers to provide durability and prevent moisture, and a thick polyethylene tank to reduce odors. All exterior metal is powder coated for a long-lasting finish. With comfortable climate-controlled interiors, advanced low-odor flushing toilets, heated water and luxury amenities, intelligent and durable construction, and quick and simple set-up, this is really the only way to go when hosting discerning guests!
