

Crestron **XiO CLOUD**TM

DEPLOY | MANAGE | MONITOR | EVOLVE

The IoT-Based Platform for the Modern, Intelligent Workplace.

THE WORLD IS FAST

Install spaces up to 90% faster and securely configure millions of devices from your browser in the same time it takes to configure one. Resolve events remotely to improve device uptime.

AND ALSO SMART

Crestron XiO Cloud™ lets you gather actionable usage data with no programming, so you can optimize people, space, and technology to truly make an intelligent enterprise.

AND SECURE

Built on the Microsoft Azure® platform, Crestron XiO Cloud is located in the same cloud as Office 365® to deliver the best, most secure cloud solution.

DEPLOY QUICKLY

Quickly and easily implement new workplace technology

- Configure new or replacement devices ahead of time
- Automatically retrieve device settings
- Simple drag-and-drop naming, configuration, and organization

MANAGE REMOTELY

Update settings and firmware remotely

- Change setting once, update everywhere immediately
- Firmware update everything at once securely
- Cloud audit logs allow quick problem identification and solution

MONITOR INSTANTLY

Instant notification and remote implementation

- View live status of millions of devices at any time
- Know any change on a device within seconds
- No extra tools to configure required

EVOLVE CONFIDENTLY

Design our workplace technology around your team

- Interactive dashboards give real-world usage data
- Gather data with zero programming
- Optimize your workplace technology experiences

Simple, Flexible Room-based Pricing

You asked, we listened. Now, you can purchase the Crestron XiO Cloud service on a monthly basis, with pricing based on the number of rooms and service options you select. Each service was developed to suit the needs of different users and ensure that they can deliver the best possible experience and white glove-level service in every space.

ENDPOINT MANAGEMENT (required for each room)

Provision devices in a room before installation, without going on site. Endpoint management will allow you to manage firmware, settings, and programs on all devices in a room, with a complete log of all changes making it easy to set up and continue to manage any space.

WORKPLACE ANALYTICS

Understand how spaces are being used, and by how many people. Workplace analytics will provide enhanced dashboards allowing you to best understand how rooms and systems are being used. These include system usage versus occupancy, and new people counting and room capacity functionality to understand how many people are actually using rooms versus their current capacity.

SUPPORT

Provide white glove help desk functionality to support end-users and keep spaces up and running, without running to them. Support includes remote control of touch screens (TSS, TSW, Crestron Flex) allowing for step-by-step assistance or testing remotely alerts for device status changes, and device technical dashboards.

API ACCESS

Easily integrate XiO Cloud with your preferred Business Intelligence platform or other management tools to gain more powerful actionable insights. Using a Standard REST API, XiO Cloud can work with a full range of other business tools to ensure that your systems are utilized in an optimal fashion.

Service	Key features	Room price per month (advertised price)
Endpoint Management (required)	<ul style="list-style-type: none">Provision offsiteManage remotely	\$3
Support	<ul style="list-style-type: none">Support remotelyReceive alertsIncident dashboards	\$4
Workplace Analytics	<ul style="list-style-type: none">Receive action usage data	Beta version provided at launch
