2019 Natchitoches Parish Area Chamber of Commerce Non-Profit Business of the Year _ Closing Report Comments

We have worked hard over the year to better position our health system to better care for you. We are extremely excited about the new services we plan to roll out across the health system this year to make it more convenient for you to get the professional, personalized integrated primary and specialty care services your family and you deserve in one convenient location. We are accepting new patients in all of our health

center sites and we would welcome the opportunity to become your family's medical

home. At Outpatient Medical Center Inc., it is not about the money. It is about – you. Because caring for your family and you to help keep you healthy and whole is what we have been doing for over 41 years. Whether you have the ability to pay for services or not has no bearing on the compassionate, personal, professional services you will receive when you visit one of our health centers. In addition, if you have not been in to see a primary care clinician or Dentist recently, we personally invite you to pick up

the phone and make an appointment with us today. On behalf of our Board of Directors and dedicated staff, we wish your family and you continued good health and prosperity in the New Year. It has been and continues to be our privilege and pleasure to serve your family and you because - Caring for you is

Our Mission

what we do."

The mission is to provide affordable and accessible

comprehensive primary health care services, dental care and behavioral services to our underserved and uninsured patients, regardless of their ability to pay. To participate in the activities designed to promote wellness without regard to physical or personal characteristics
