

Disease Management

AultCare's Disease Management focuses on providing members with education on prevention and ensuring members with chronic health issues have all the tools and services necessary to improve their health.

Disease Management offers an integrated and comprehensive approach to manage conditions, reduce complications, improve quality of life, and decrease costs. These resources are available at no additional cost for all AultCare members.

Programs and resources available within Disease Management include:

- **Telemonitoring Programs**
 - > **Chronic Obstructive Pulmonary Disease (COPD)**
 - > **Congestive Heart Failure (CHF)**
 - > **Diabetes**
- **Educational Resources**
 - > **Mental Health**
 - > **Pre-Diabetes**
 - > **Stroke**
