

Founder and CEO International Eco Fuels, Inc

Dr. Ricardo "Rique" Ford

Rique Ford is the founder and CEO of **International Eco Fuels, Inc.** ("IEF"), a company "fueled" by his passion for Environmental Stewardship. From his childhood, Mr. Ford had a desire to "save the planet" from those who were "blind" to the harm that toxic products and harmful actions were causing the planet. Mr. Ford always and continues to live his life with purpose. Even though he had the luxury of retiring prior to the age of forty due to his business and financial success, he was always motivated to make a difference. A few years after retiring he chose to start **International Eco Fuels, Inc.** His **Vision** was focused on both the health of humanity worldwide and the well-being of our planet. His **Mission** was to save millions of lives by significantly reducing global air pollution and hazardous toxic chemicals from the atmosphere, waterways and habitats while restoring earth's ecological balance and environment before permanent and irreplaceable damage occurs.

IEF's engineering team has perfected and commercialized its chemical fuel additives, lubricants, and cleaners to be a leading "industry standard" that the world consumes in everyday uses and operations. **IEF's Eco-Fuel Saver**, its fuel additive, **Xtreme Eco-Lube**, its lubricant, and **ECO-PROVEN**, its cleaner, are used as a staple in the engines of the US Military, as well as in governments all over the world. You may also find **IEF** products on the shelves of many retail outlets world-wide and also white labelled to other internationally recognized brands. Mr. Ford has grown and built **IEF** into a global leader in chemical nanotechnology engineering, producing proven ecological solutions in the highest level of effectiveness whilst maintaining international safety standards and certifications.

International Eco Fuels' products and sustainable solutions can be found in almost every country in the world, its sales and distribution network is massive and continues to grow exponentially. Due to Mr. Ford's integrity, resume and proven track record, governments such as the United States and its U.S. Air Force, U.S. Army and U.S. Navy, India, Canada, Mexico, Jamaica and China, to name just a few, have contracted **IEF** to help reduce global greenhouse gases ("GHG") and toxic emissions from transportation

hydrocarbon fuel consumption, coal power plant production, industrial and commercial exhaust, and particulate matter from oil, gas, biodiesel, and municipal waste.

In addition to selling its eco-friendly products to governments and OEM's around the world, **IEF** has been consulting and selling its eco-friendly, organic and biodegradable solutions to large industrial Fortune 100 corporations, such as Lockheed, Boeing, Tesla, Hughes Aircraft, Raytheon, McDonald Douglas, Ford, Gm, Chrysler, Apple, Johnson and Johnson, 3M, GE, Parker Hannifin, Mercury Marine, Rhone Poulenc, Wacker Chemie AG, Rain Bird, Cardinal Health, and Martin Marietta to name a few.

Rique Ford continues to quietly make a difference by using his resources to complete numerous R&D chemical engineering advancements beyond **IEF's** current offerings of products and solutions. Mr. Ford also generously contributes to foundations determined to restore global environmental health and the well-being of humanity. Mr. Ford utilizes sponsorships and collaborations worldwide to bring awareness and to promote understanding of the relevant environmental issues of today, as well as to showcase **IEF's** available solutions to promote the promise of tomorrow's future.

◆ *There is a direct correlation between our passion and our potential...*
