

# Safe Landing, Teen Substance Abuse Treatment Center, Opens in North Miami

Safe Landing offers transformative care for teens struggling with substance abuse nationwide

NORTH MIAMI, Fla., Nov. 09, 2017 (GLOBE NEWSWIRE) -- The substance abuse epidemic impacting all of the United States is devastating families, derailing promising futures, and threatening American communities. One of the largest, most underserved populations impacted by this epidemic are young people between the ages of 14 and 17. This is the age range many people living with substance abuse disorders begin the experimentation that leads to dependency. Intervention at this stage can be crucial to protecting future generations and ending the addiction epidemic once and for all.

Recognizing the dire need for youth treatment of substance abuse and addiction, Niznik Behavioral Health opened a North Miami facility, Safe Landing, to help meet that need. With a specific focus on healing as a family and forming valuable tools and coping mechanisms, Safe Landing, [drug rehab for teens](#), is dedicated to addressing this crucial demographic and help end the epidemic once and for all.

A representative of Safe Landing recovery for teens comments:

“Our mission in providing addiction treatment to young people is to provide alternative, positive life options, inspire perseverance, and prove that it is possible to turn one’s life around. With the disease of addiction, early intervention can prevent years of undue suffering and strife, allowing your children and young adults to flourish and reach their full potential. We also understand that addiction affects the entire family and with teaching family members how to provide recovery support we aim to promote a home environment conducive to long-term recovery.”
