

Terms of Acceptance

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both parties to be working towards the same objective. Chiropractic care has only one goal; which is to obtain optimal health. It is important that each patient understands the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Adjustment: An adjustment is the specific application of manual forces to facilitate the body's correcting of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Health: A state of optimal physical, mental and social well being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more on the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal exam, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment of any findings we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer advice regarding treatment prescribed by other. *Our only practice objective* is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific manual manipulation of the spine to correct vertebral subluxation.

I, _____ have read and fully understand the above statements. All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. Therefore I accept chiropractic care on this basis.
