EquipmentShare Track is smart jobsite technology built by contractors, for contractors, helping you manage your entire fleet from one dashboard on your phone, tablet or computer. Streamline communication and maintenance, eliminate guesswork, reduce risk on your jobsites and make your fleet data work for you with EquipmentShare Track.

---

SMART JOBSITE TECHNOLOGY

### Stay connected to your people and assets:

- Monitor hours worked and where time is spent
- Real-time location of equipment, vehicles and materials
- Exact equipment utilization to get the most from every machine
- Digital Work Orders and complete maintenance history
- Access codes and historical equipment access data

---

CONNECT EVERY EMPLOYEE AND ASSET.
Manage your mixed fleet, monitor hours worked and access all your asset data from one single dashboard on any connected device—no matter the OEM. Simplify your approach to equipment management and employee time tracking, and use EquipmentShare Track across your entire jobsite including your heavy equipment, buckets and attachments, work and service trucks.

See the data that helps you get more work done, faster:

- Number of hours worked and on which jobs
- Engine status and run time of connected machines
- Location of every asset, from boom lifts to buckets
- Status of every Digital Work Order across your fleet
- Detailed reports on utilization, trips, Geofences and more
**CUSTOM ALERTS**

Set **Custom Alerts** so you know exactly where your assets are, who is using them and when. EquipmentShare Track monitors engine health, fuel levels and more to keep you informed of your fleet status and health. These alerts allow your team to stay on top of what matters most.

<table>
<thead>
<tr>
<th>Stay Informed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Every time your machine enters or exits a Geofence</td>
</tr>
<tr>
<td>Push alerts on fuel levels and engine health</td>
</tr>
<tr>
<td>Idling time and status</td>
</tr>
<tr>
<td>Driver speeding</td>
</tr>
<tr>
<td>DEF and Regen state</td>
</tr>
<tr>
<td>Custom alerts for all engine data, no matter the OEM</td>
</tr>
</tbody>
</table>
Digital Work Orders simplify and streamline maintenance for your entire team, eliminating unnecessary service delays and paper trails. Digital Work Orders create a historical service record for every machine in your fleet. This helps your team stay proactive and save money: Reactive maintenance costs 3-4x as much as preventative maintenance.

- See your fleet’s complete service history in one dashboard:
  - Reduce diagnostic time by 95%
  - Predict machine failure based on historical performance
  - Identify recurring issues across your fleet
  - Reduce parts and service spend by up to 50%
Prevent theft and unauthorized machine use with EquipmentShare’s Sentry Keypad. Ditch the universal key; instead, provide authorized operators with unique access codes to start machines. Sentry Keypad locks down machines, locks out thieves and untrained operators and communicates with EquipmentShare Track to alert you of any attempts to operate an asset.

**Receive alerts for Keypad activity:**
- Unauthorized access attempts
- Authorized user logs on and starts machine
- Multiple access attempts made
- Successful lockdown is initiated
Your employees can clock in and out from their phone using **Time Cards** in the Link app and label their hours to show the job and Digital Work Order task worked. Managers can log into EquipmentShare Track to see exactly how many hours are spent on every task, Digital Work Order and job, approve and assign hours, edit **Time Cards** and view total hours for a selected pay period.

---

**TIME CARDS**

See exactly where time is spent:

- Associate tracked hours with specific Digital Work Order tasks and jobs
- Drivers, operators and field employees easily clock in and out from EquipmentShare’s E-Logs or Link apps
- Make informed estimates of how long a Digital Work Order will take to complete
With Tags, you can keep track of your buckets and attachments on the jobsite. EquipmentShare Track-equipped assets and mobile devices with the Link app installed pick up Bluetooth signals from Tagged implements so you can quickly find them on the jobsite. Save money on replacements by installing Tags on your implements and attachments.
EquipmentShare Track collects critical engine data from your machines and turns it into actionable knowledge with robust utilization reports. Get a complete breakdown of how every asset operates with reports on its complete history: run time, fuel use, locations and maintenance. Reports offer a comprehensive look at more than just machine health.

FLEET UTILIZATION REPORTS

Stay informed on the status of every asset in your fleet:

- Quickly see hours machines ran on any jobsite
- Locate and replace Tags with low batteries
- Detailed mileage and fuel reports make IFTA compliance easy
- Build custom reports for the insights you want

Create fleet reports to understand how your fleet operates and make data-informed business decisions.
EquipmentShare Track collects the Hours of Service (HOS) and Records of Duty Status (RODS) data the FMCSA requires. Then, drivers can access E-Logs from EquipmentShare Track or from the Contractors E-Logs app and confidently provide accurate, real-time HOS, RODS and DVIR information to law enforcement. Time Cards track driving time and give you a complete picture of hours worked for every employee and task.

---

**ELD-COMPLIANT SOLUTION**

EquipmentShare Track collects the Hours of Service (HOS) and Records of Duty Status (RODS) data the FMCSA requires. Then, drivers can access E-Logs from EquipmentShare Track or from the Contractors E-Logs app and confidently provide accurate, real-time HOS, RODS and DVIR information to law enforcement. Time Cards track driving time and give you a complete picture of hours worked for every employee and task.

**Adapt to new ELD laws easily with EquipmentShare Track:**
- Collect HOS and RODS data automatically
- E-Logs app prevents fines and violations with real-time mobile access
- Retain robust driver logs and historical ELD data
- Integrated with Time Cards

Drivers get on-the-road access with the E-Logs app.
**EquipmentShare Track** goes everywhere you go with Link, the mobile app. Log in to access your digital toolset on your cell phone with Link, available in the App Store and on Google Play. Link keeps employees in the field connected and gives you access to the most important management tools for on-the-go updates on your fleet.

- Get equipment updates on your phone:
  - Access and edit Digital Work Orders in the field
  - Easily track hours worked with Time Cards
  - View current, upcoming and historical rentals
  - Strengthen asset location monitoring with more Tag pings
  - Picks up Tag location pings to strengthen asset location monitoring

Locate assets and Tagged attachments from your connected mobile device.

Create, update and track the progress of every Digital Work Order.
Connect and monitor your assets, track time worked on every task and streamline maintenance processes with the power of EquipmentShare Track. Complete jobsite visibility helps you make better decisions on every project and finish tasks accurately and efficiently. A single-dashboard view and Link connectivity put the most important data where you need it: top-of-mind and in the palm of your hand.
