

S.T.E.A.M. NEWS

Quarter 4 | October-December | 2018

**Science • Technology • Engineering
Arts • Agriculture • Aerospace •
Aviation • Mathematics**

As our program grows, we hope to reach more and more students to bring awareness and education to them about the S.T.E.A.M. fields. Many students are unaware how fun and diverse the S.T.E.A.M. fields are. We hope to inspire every young mind we encounter to pursue a career in S.T.E.A.M.!

Autumn Session

Hello from the S.T.E.A.M. Team!

We had an amazing fourth quarter this year! We were able to impact so many students from different walks of life, all thanks to your support!

One of the main highlights of this quarter was our S.T.E.A.M. Expo, which took place at Los Angeles Trade Tech College on October 25th. We were able to host over 2500 people, including students, instructors, family, and friends on the campus! Attendees were able to tour the campus, attend informative seminars, and witness fun interactive displays. The students visited with other universities from across the country for one-on-one consultation

Another highlight of this season was our annual National College Resources Foundation Gala, where donors pledged financial support to our S.T.E.A.M. program. We are very grateful to our sponsors!

Ignite, Excite, Build!

S.T.E.A.M. Team Highlights

Through interactive displays and hand on workshops the S.T.E.A.M. Mobile inspires curiosity and instills a sense of accomplishment, as students take on the traditionally viewed as “harder” subjects in school with a fun twist.

David Starr Jordan High School – *October 15-18, 2018.*
Long Beach, CA

One of our main beliefs at Students Think S.T.E.A.M. is that the S.T.E.A.M. fields are fun and accessible to any student – even students that possess intellectual disabilities. During this season, S.T.E.A.M. had the privilege of working with some of the students with special needs at Jordan High School for a four-day curriculum. Our topics ranged from Circuitry to Chemistry, and we tailored our curriculums so that every student could participate and interact with their peers. We had a wonderful time working with these students!

Earthfest LA 2018 –
October 20, 2018.
Culver City, CA

S.T.E.A.M. was one of many groups present at Earthfest LA, a free environmental festival. The purpose of this event was to educate local urban communities about the environmental issues we face as a society. These are causes that we believe in, so we were very pleased to be invited to this educational and entertaining event! We had a great time and enjoyed interacting with those who attended!

Almond Elementary Career Day – *October 23, 2018.*
Fontana, CA

Our S.T.E.A.M. Team had the privilege of speaking to the entire fifth grade class at Almond Elementary for Career Day. After a short presentation about why S.T.E.A.M. is fun, important, and reachable for everyone, we invited the students into the S.T.E.A.M. Mobile for a lesson on circuitry. All of the students did a great job working together and learning!

NCRF S.T.E.A.M. Expo –
October 25, 2018.
Los Angeles, CA

This year, over 2500 students attended NCRF’s Fifth Annual Students Think S.T.E.A.M. Expo at LATTCC! We were very pleased to see so many students and families excited about the S.T.E.A.M. fields! Some of the features of the expo included: a \$1000 scholarship giveaway; hands-on aerospace, robotics, and automotive demonstrations; and one-on-one visits with colleges with a focus on the S.T.E.A.M. fields. We hope that all of the students, educators, and families that attended had a wonderful time, and we look forward to seeing you at next year’s S.T.E.A.M. Expo!

NCRF Latino College Expo –
November 10, 2018.
Pomona, CA

We were delighted to be part of the sixth annual Los Angeles Latino College Expo. Students and their families were able to attend seminars in both English and Spanish, listen to a live mariachi band, and apply/receive acceptances to universities ON THE SPOT! We appreciate those who took time to attend, and we hope to further bridge the gap between minorities and the S.T.E.A.M. fields.

NCRF Annual Gala –
November 30, 2018.
Los Angeles, CA

The S.T.E.A.M. Mobile was one of the featured displays at the annual NCRF Gala. We were proud to show our sponsors the many things we were able to accomplish this year, and to thank them for their support.

Full STEAM Ahead –
December 1, 2018.
Los Angeles, CA

Our final event for the year was with the Gifted and Talented Network of African American students. There were several different engaging STEAM activities for the students as well as their parents, including coding, graphic design, a book study, and instructional technology.

Upcoming Events:

NAACP of San Gabriel Valley 20th Annual Tribute to Dr. MLK: 01/21/19

NCRF Black College Expo, Sacramento: 01/26/19

NCRF Black College Expo, San Diego: 01/29/19

Happy New Year from
the S.T.E.A.M. Team!

We look forward to working with
you in 2019!

Thank you for continuing to support our S.T.E.A.M. Program!
