Juliettes' Cakes

Cake Portions & Servings Guide

The portion sizes in the tables opposite are suitable for catering portions of 1x2 inches, a generous family size portion will produce less, so this is purely a guide.

To get the best results when cutting your cake use a very sharp knife, wipe clean inbetween cuts and try to serve one piece at a time, rather than cut all at once, this reduces crumbling on a lovely fresh cake.

Your caterers should be experienced in cutting cake, but we have provided a cutting guide to help you get the most from your cake if you are serving it yourself.
