INTELLIGENCE PLATFORM FOR INDUSTRIAL IoT

www.narrativewave.com

Turn your data into actionable insights.

NarrativeWave is the first intelligence platform to provide data-to-decision analytics for the Industrial Internet of Things (IIoT). The company's software combines your data with your domain expertise to auto-generate actionable business insights and recommendations, providing real-time decisions on critical industrial assets.

REAL-TIME DECISIONS ON CRITICAL INDUSTRIAL ASSETS

OUR PLATFORM:

NarrativeWave connects your engineers expertise with operational data, creating an evolving knowledge base of how your equipment should be operated, maintained, and evaluated. The platform's intuitive interface allows users to create and iterate over detection models, without the ongoing need of developers or data scientists. Using advanced algorithms, the system automates the tedious process of root cause analysis to auto-generate critical decisions and reports. Most importantly, the results are available in real-time to ensure immediate impact on business operations.

HOW IT WORKS:

USER DIRECTED INTERFACE

Engineer focused intuitive interface to create detection models without the need for developers or data scientists.

AUTOMATED RECOMMENDATIONS

Based on your engineers' knowledge and their accurate understanding of your assets.

ADVANCED EQUATIONS

Breakthrough system of customizable equations to power the most cutting edge analytics.

PROCESS FLOWS

A cutting-edge interactive visualization giving the ability to define and identify the flow of root cause analytics.

BUSINESS INSIGHT REPORTS

Auto-generated reports providing real-time decisions & minimizing downtime on critical industrial assets.

KNOWLEDGE BASE

Centralize your engineers' expertise making it available across functions, departments & regions.

OUR BENEFITS:

IMPROVED PRODUCTIVITY

Automates manual labor intensive processes incurred by complex analysis of large sets of data.

INCREASED ACCURACY

Computer automated proven processes deliver more reliable insights & eliminate human errors.

REDUCED TIME TO DEPLOYMENT

Enables engineers to build models on their own, without a developer or data scientist.

FOUNDATION FOR MORE COMPLEX ANALYTICS

Creates a next generation knowledge base established on an accurate understanding of your data, analytical models, and assets.

RESULTS WITH TOP 5 OEM COMPARED TO TRADITIONAL DIAGNOSTIC WORKFLOW

95% TIME REDUCTION

25% INCREASED ACCURACY

50-75% COST REDUCTION
