

SONICCLOUD SOUND PERSONALIZATION

For Zoom, Webex and More!

SonicCloud is a powerful app that allows you to enhance and personalize **all** the sound on your computer, especially if you have **mild to profound** hearing loss.

It's a game changer for people like Michelle, who have trouble hearing clearly on their laptop or desktop machine. Michelle discovered it at the HLAA 2019 convention. [\(click here\)](#)

Use it for **Remote Work** Video Conferencing from home, **Remote Learning**, watching training videos or lectures, or just relaxing and watching Netflix or listening to Spotify on your Windows or Mac computer!

Zoom, Webex, Skype Calls

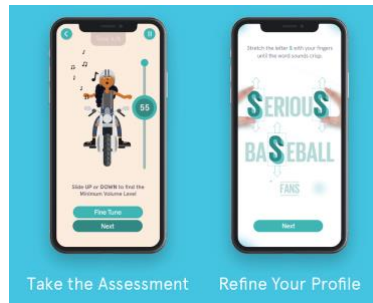

Netflix, Spotify

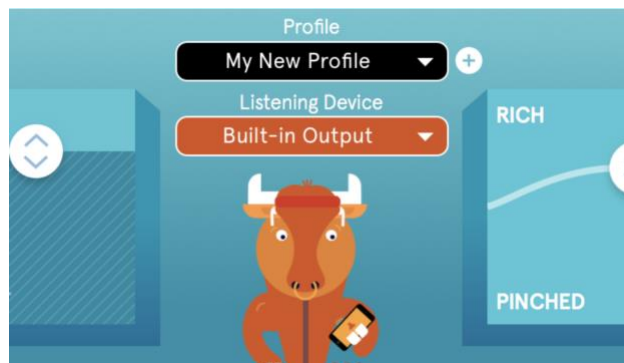

Online Lectures

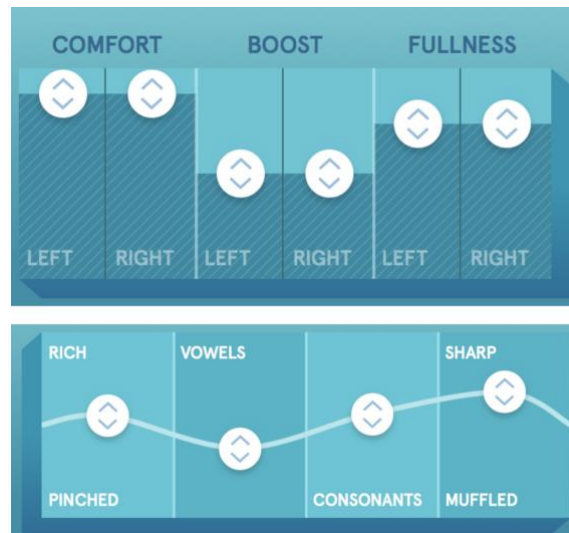

First, take the SonicCloud Hearing Assessment on your [iPhone](#) or [Android phone](#) to create your Hearing Profile

Next, log in to SonicCloud on your computer and select your Hearing Profile. The app will automatically personalize ALL AUDIO on your computer.

Want clearer voices? Fuller, more rounded sound? You have full control to make any adjustments, *while you listen*

It's easy to set up and install! Download SonicCloud for your Windows or Mac computer [here!](#)
