SUSTAINABILITY REPORT

We operate as a company that is committed to a sustainable policy of preserving the environment and using green energy. We also encourage our business partners to do so and create greater awareness among our guests.

ENVIRONMENTAL POLICY

In 2021, we committed to monitor and measure the impact of our activities on the environment in order to preserve the environment and to fulfill the goals and measures set in the environmental policy. We will inform employees about our environmental policy, goals and measures, and their role in this. We will inform our guests and suppliers about the effort to reduce the negative impact of our activity on the environment. We will promote sustainable mobility.

EMPLOYEE MANAGEMENT POLICY

In 2021, we have committed to value and treat our employees with respect, as we have done so far, because we are aware that they are the greatest value of our company. We will not allow discrimination and disrespect for human rights. In accordance with the capabilities, we will provide them with education and training.

PURCHASE POLICY

In 2021, we committed to review and evaluate the offer of local and Slovenian suppliers when choosing suppliers, and to take into account the extent to which the supplier is environmentally responsible. When purchasing products, we will pay attention to products made from recycled materials, so that they are environmentally responsible and energy efficient.
