**We at PST are here for you also in Corona times**

Dear Client/Partner,

We, just as you, are working in a situation which is changing fast, and with consequences that are hard to predict. To minimize the risks for you, and our staff; and to be able to secure the best possibilities of delivering our products; we at PST are working along with the following guidelines.

- **Preventive measurements** – we are working to reduce the risks of infection among our staff by aid of clear and mandatory sanitary regulations, and by implementing safe working distance amongst us. In case a co-worker has symptoms like of a cold, fever, cough etc. they must stay at home; and clerks/officer who are able to fulfil their duties by working from home should do so.
- **Redundancy** – we are safeguarding our work force by implementing back-up plans in case we will have a scenario where a Corona infection is spread amongst us. This means that we will operate in production teams working in shifts. This will give us flexibility and safety in our production as we can maintain production with different groups that do not physically interact with each other.
- **Material supply** – we are in regular contact with our main suppliers who are still able to timely supply the material we need for our production. However, some non-standard drive units may have longer delivery times than normal.
- **Travelling** – all international business trips have been suspended for the time being, and the frequency of national trips are being kept at the lowest minimum rate.
- **Visitors** - all visits are restricted. All physical meetings should be replaced by virtual meetings to the most possible extent. If you as a client require a physical meeting - this can be arranged as long as both your, and our, sanitary guidelines are fulfilled

Until further notice, we at PST continue to offer, produce and deliver our products just as usual; and we are looking forward to hearing from you, and to be able to fulfil your demand for solutions for material transport in your business.

Yours sincerely

Magnus Nilsson  
MD
