NOTICE OF SEQR ACTIONS – Highway Department Salt Shed and Processing Facility
Intent to Act as Lead Agency

Issued by Town of Somers Town Board
Westchester County, New York

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act (SEQRA)) of the New York State Environmental Conservation Law and Chapter 92 (Environmental Quality Review) of the Code of the Town of Somers, New York.

The Town Board of the Town of Somers, Westchester County, declares itself lead agency for Construction of a Salt Shed and Processing Facility at the Highway Department.

The Somers Town Board at its meeting of January 10, 2019 established itself as Lead Agency with regard to this Proposed Action under the procedures and requirements of SEQRA and Chapter 92 of the Somers Town Code as part of an uncoordinated review.

The Proposed Action is an Unlisted Action under SEQRA as per Chapter 92 of the Code of the Town of Somers in conjunction with Article 24 of the NYS Environmental Conservation Law.

PROPOSED LEAD AGENCY: Town Board, Town of Somers
Somers Town House
335 Route 202
Somers, New York 10589

TITLE OF ACTION: Construction of Salt Shed and Processing Facility at the Somers Highway Department

DESCRIPTION OF ACTION: The project is the construction of a new Salt Processing Shed to provide adequate storage and processing of untreated (raw) salt at the Town of Somers Highway Department. It will allow currently untreated salt that is dumped in the highway department parking lot for treatment with brine prior to its relocation inside the existing storage shed to be properly stored until it is treated. This will reduce the opportunity for untreated salt to leach into the adjacent Muscoot Reservoir which is part of the New York City watershed. Therefore, the project will reduce the environmental risks associated with the unsheltered storage of raw salt and significantly improve the Town’s overall winter operations.

LOCATION: The Highway Department is located at 250 Route 100, Town of Somers, NY 10589 (Tax Lot 28.10-2-1)

SUPPLEMENTAL INFORMATION: A Short Form (EAF) has been prepared for the Proposed Action. This form is being distributed to all involved and Interested Agencies (see list below), and this information is also available for review in the Planning and Engineering office at the Town House and on the Town’s web site.

Short Environmental Assessment Form

Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur," or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

☑ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

NEGATIVE DECLARATION
Notice of Determination of Non-Significance

Date: January 10, 2019

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

The Town of Somers Town Board, as Lead Agency has determined that the Proposed Action described below will not have a significant effect on the environment and a Draft Environmental Impact Statement will not be prepared.

Name of Action: Highway Department Salt Processing Shed

SEQR Status: Unlisted Action

Conditioned Negative Declaration: 

Yes  No

Description of Action: The project is the construction of a new Salt Processing Shed to provide adequate storage and processing of untreated (raw) salt at the Town of Somers Highway Department. It will allow currently untreated salt that is dumped in the highway department parking lot for treatment with brine prior to its relocation inside the existing storage shed to be properly stored until it is treated. This will reduce the opportunity for untreated salt to leach into the adjacent Muscoot Reservoir which is part of the New York City watershed. Therefore, the project will reduce the environmental risks associated with the unsheltered storage of raw salt and significantly improve the Town’s overall winter operations.

Location: The Highway Garage is located at 250 Route 100, Town of Somers, NY 10589 (Tax Lot 28.10-2-1)

Reasons Supporting This Determination:

Based upon a review of Parts 1, 2 and 3 of the Short Environmental Assessment Form (EAF) and all other application materials that were submitted in support of the Proposed Action, the Town Board makes the following findings:

Part 2 – Impact Assessment.

See Attached

Part 3 - Determination of Significance
EAF Part 1. #13.a. Does any portion of the site of the proposed action, or lands adjoining the proposed action, contain wetlands or other waterbodies regulated by a federal, state or local agency?

Part 2 Impact Assessment - #5 Will the Proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?

The proposed action will result in a reduction in the leaching of untreated salt in the Muscoot Reservoir, decreasing chloride concentrations in the water system, thereby having a positive impact on the environment and the drinking water supply.

Conclusion

The Somers Town Board has conducted an independent review and an analysis of the entire record and the potential environmental effects of the proposed project.

The Town Board has completed a careful and thorough review of the identified areas of the Short Form EAF. Based upon all of the information generated for the proposed project and its own careful and thorough independent review and public input regarding the potential environmental effects, the Town Board has determined that the impacts identified in Part 2 of the EAF, are in fact positive or non-existent and will result in a positive impact on the environment. The Town Board determines there is no significant adverse impact on the environment.

As a result of its review of the proposed project, the Town Board has determined that a negative declaration be issued on the potential impacts for the proposed action outlined in Part 2 of the EAF which have been deemed to have been mitigated to the maximum extent practicable and will not have a significant adverse impact on the environment.

ANSWER TO SECTION II: GRANTEE CERTIFICATION AS TO PUBLIC PURPOSE QUESTION #B2

The Town's Consulting Engineer is Woodard& Curran and they have been working with the Highway Department to design a salt shed and salt processing facility that will complement the existing shed and resolve the environmental issues caused by uncovered salt run-off into the adjacent reservoir that is part of the New York City watershed. As a result, they are the selected consultant to design and work with the Town to construct the salt shed facility.

However, the contractor, supplier or vendors will be determined through a public bid process and the selection of a successful bidder.

Part 3 Determination of Significance

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

☑ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

Date: January 10, 2019

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

The Town of Somers Town Board, as Lead Agency has determined that the Proposed Action described below will not have a significant effect on the environment and a Draft Environmental Impact Statement will not be prepared.

Name of Action: Highway Department Salt Processing Shed

SEQR Status: Unlisted Action

Conditioned Negative Declaration:  

_____ Yes

X No

Description of Action: The project is the construction of a new Salt Processing Shed to provide adequate storage and processing of untreated (raw) salt at the Town of Somers Highway Department. It will allow currently untreated salt that is dumped in the highway department parking lot for treatment with brine prior to its relocation inside the existing storage shed to be properly stored until it is treated. This will reduce the opportunity for untreated salt to leach into the adjacent Muscoot Reservoir which is part of the New York City watershed. Therefore, the project will reduce the environmental risks associated with the unsheltered storage of raw salt and significantly improve the Town’s overall winter operations.

Location: The Highway Garage is located at 250 Route 100, Town of Somers, NY 10589 (Tax Lot 28.10-2-1)

Reasons Supporting This Determination:

Based upon a review of Parts 1, 2 and 3 of the Short Environmental Assessment Form (EAF) and all other application materials that were submitted in support of the Proposed Action, the Town Board makes the following findings:

Part 2 – Impact Assessment.

See Attached

Part 3 - Determination of Significance
EAF Part 1. #13.a. Does any portion of the site of the proposed action, or lands adjoining the proposed action, contain wetlands or other waterbodies regulated by a federal, state or local agency?

Part 2 Impact Assessment - #9 Will the Proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?

The proposed action will result in a reduction in the leaching of untreated salt in the Muscoot Reservoir, decreasing chloride concentrations in the water system, thereby having a positive impact on the environment and the drinking water supply.

Conclusion

The Somers Town Board has conducted an independent review and an analysis of the entire record and the potential environmental effects of the proposed project.

The Town Board has completed a careful and thorough review of the identified areas of the Short Form EAF. Based upon all of the information generated for the proposed project and its own careful and thorough independent review and public input regarding the potential environmental effects, the Town Board has determined that the impacts identified in Part 2 of the EAF, are in fact positive or non-existent and will result in a positive impact on the environment. The Town Board determines there is no significant adverse impact on the environment.

As a result of its review of the proposed project, the Town Board has determined that a negative declaration be issued on the potential impacts for the proposed action outlined in Part 2 of the EAF which have been deemed to have been mitigated to the maximum extent practicable and will not have a significant adverse impact on the environment.

SUBJECT: Federal and State Grant Quarterly Status Report

The enclosed Federal and State Grant Quarterly Status Report provides information on current year projects and any open prior years’ projects which have been received and logged by the New York State Education Department. Please use the Quarterly Status Report to reconcile your grant records. Report fields are defined as follows:

- Project # - The # assigned by SED at the time of project approval.
- Contract # - For projects running through the grant contract process, the New York State contract number will be listed.
- Funding Source - The name of the Federal or State grant program under which the project is funded.
- Budget - The current approved budget (FS-10) including all approved amendments.
- Scheduled/Paid to Date - The total amount of payments processed including scheduled but not paid. An asterisk (*) indicates that the Final Expenditure Report (FS-10-F) has been received. If the FS-10-F has been audited and closed, the Paid-to-Date will equal the Budget.

Projects listed as UNDER REVIEW have been received and logged by the program office but have not been forwarded to Grants Finance for processing. The project will continue to show as UNDER REVIEW until (1) the program office approves the application and forwards the budget to Grants Finance or (2) the application is disapproved by the program office. Disapproved projects do not appear on this report.

- Start/End - The funding dates of the project, including any extensions. Funding dates are the dates in which project encumbrances can be made.

If you have any questions about the Quarterly Status Report, please contact Grants Finance.

Hon. Terrence P. Murphy
NYS Senate, 40th District
LOB 817
Albany, NY 12247

Dear Senator Murphy,

The Town of Somers respectfully requests $150,000 in funding toward the construction costs of a new salt processing shed for the Town Highway Department. The proposed project will reduce the environmental risks associated with the unsheltered storage of raw salt and will significantly improve the Town’s overall highway operations.

The new salt processing facility is a critical need within the Town of Somers. Currently, the Town receives untreated salt which remains exposed to the elements until it is treated and properly stored. The proposed new salt shed will allow for the proper storage of the untreated salt and prevent runoff that is contributing to increased chloride concentrations in the Muscoot Reservoir, part of New York City’s Watershed System. Enclosed is a more thorough description of the project and a completed Preliminary Application for the funding.

Thank you for your consideration of this important request. Please direct any questions to me or the Town’s Director of Planning, Syrette Dym, at (914)277-5366.

Respectfully Yours,

Rick Morrissey
Supervisor

Town of Somers Salt Processing Shed

Project Description

The purpose of the project is to construct a new Salt Processing Shed to provide adequate storage and processing of untreated (raw) salt at the Town of Somers Highway Department. The site is directly adjacent to the Muscoot Reservoir, which is part of New York City’s Croton Watershed system. Currently, untreated salt is delivered and dumped in the parking lot of an existing salt shed. The untreated salt remains exposed to the elements until it can be treated with brine for the de-icing of roads during winter operations. After being treated, the salt is moved inside the existing storage shed. Because there is no covered area for the untreated salt to be delivered, it is outside exposed to the elements for several days. The untreated salt then leaches into the reservoir, causing increased chloride concentrations in the water system which has a negative impact on the environment and the drinking water supply for millions of people.

The proposed additional new processing shed will allow the Town to properly store the untreated salt until it is processed. The proposed project will ultimately reduce the environmental risks associated with the unsheltered storage of raw salt and would significantly improve the Town’s overall winter operations.

The engineering firm Woodard & Curran has developed a conceptual site plan to meet the intent of the project. The proposal is for the construction of an additional 56’ x 50’ timber storage/processing shed. The additional shed is similar to, but smaller than the existing one and will be used for the receiving of untreated salt. As part of the improved operations, untreated salt will be delivered and processed inside the new shed. The treated salt will then be conveyed to and stored in the existing salt shed until it is used on the winter roads. This will eliminate the leaching of chloride into the reservoir.

In addition to the new structure, there is miscellaneous work involved, such as the construction of loading ramps, drainage infrastructure, relocation of a utility post, pavement repairs, lighting, etc. It should be noted that in the development of the conceptual site plans, Woodard & Curran also engaged in communications with NYS DOT regarding the ownership of the property contiguous to the Town’s highway garage as the proposed layouts require an encroachment on that property. Fortunately, NYS DOT has indicated that the parcel in question was abandoned to the Town of Somers by NYS DOT in 1951.

Funding

The conceptual site plan that is being proposed has an estimated construction cost of $554,000 plus engineering and permitting support costs of $66,000 for a total estimated project cost of $620,000 including contingencies. The Town of Somers intends to fund this project through two separate grants: This SAM request for $150,000 and a pending East of Hudson Watershed Corporation (EOH) request for $175,000 for a total of $325,000 in grant funding. The estimated deficit of $295,000 will be covered by the Town as resolved by the Town Board in their July 12th, 2018 session.

RE: Preservation League of New York State – Elephant Hotel Building Condition Survey Technical Assistance Grant

The Town of Somers is in receipt of a Technical Assistance Grant from the Preservation League of New York State to undertake an updated building condition survey for the Elephant Hotel that will document conditions of the basement of the building. The survey work will be undertaken by Stephen Tilly Architect of Dobbs Ferry, a firm highly regarded in the field of historic preservation.

Stephen Tilly Architect has submitted a Scope of Work dated December 6, 2018 which outlines the work his firm will perform for a total compensation of $3,500. This report will be completed within six months of the grant award. The Town’s financial responsibility is the $500 match with the $3,000 to be paid by the Preservation League.

At its meeting of January 10, 2019, the Town Board needs to undertake the following actions:

- Authorize the Supervisor to sign the agreement with the Preservation League
- Authorize the Supervisor to execute the Letter of Understanding between the Town and Stephen Tilly Architect
- Authorize execution of a check for $500 from the Town to Stephen Tilly Architect

Once this report is completed and accepted by the Preservation League, the Town will be in a position to apply for additional grants for either further building condition updates and/or grants for building improvements.

Re: Elephant Hotel Building Condition Survey

Dear Supervisor Morrissey,

We are pleased to inform you that in response to your application to the Technical Assistance Grant Program (TAG), a grant of $3,000 has been approved for the Town of Somers. We are delighted to support your efforts to complete a Building Condition Survey for the Elephant Hotel. This funding is made possible through the Hudson River Valley National Heritage Area and NYS Council on the Arts.

The award is being made with the following agreements between the Preservation League and The Town of Somers:

1. The grant will be used as support for costs associated with the completion of a Building Condition Survey for the Town of Somers.
2. The work will be completed by Stephen Tilly Architects, who will serve as the consultant to the Town of Somers.
3. The project will be completed in accordance with the Secretary of the Interior's Standards for Rehabilitation.
4. The final product will be a Building Condition Survey, including supporting documentation.
5. The Town of Somers will submit a copy of the final product no later than six months from the date of contract signature.
6. The Town of Somers will notify the Preservation League of any changes to the project prior to the commencement of work. Any changes to the scope, consultant or timetable will require the prior approval of the Preservation League.
7. Use the following language when crediting the grant in print: The Technical Assistance Grant Program is made possible by the New York State Council on the Arts with the support of Governor Andrew Cuomo and the New York State Legislature. Generous additional support for this project has been provided by the Hudson River Valley National Heritage Area. The consultant must be notified of this requirement.
Please sign and return a copy of the following:

1. Counter-signed copy of this agreement. Return copy to the Preservation League and retain the original for your files.
2. A copy of your contract or letter of understanding between your organization and your consultant.
3. A copy of your organization’s check of $500 made out to your consultant.

Failure to respond within 30 days may cause the award to be withdrawn.

Upon our receipt of the above and following NYSCA’s release of funds to the Preservation League, we will issue a check for the grant amount and mail it directly to you.

The Preservation League will issue a media release announcing this grant when we have received all the above required documents from you.

We will provide your group with a copy of the media release and ask that you use it in making the official announcement of your award. Please wait until you have received our official press notification before publicizing your grant award. Once that has happened, please send copies of and links to any articles about this project (including your own newsletter and website).

Or behalf of the Preservation League, I send our best wishes and congratulations.

Sincerely,
