

RoHS Compliance Statement

January 10, 2019

Re: EU Directives 2011/65/EU RoHS2 and 2015/863/EU RoHS3

To Our Valued Customers:

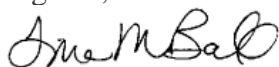

The above directives establish rules on the restriction of the use of hazardous substances in electrical and electronic equipment (EEE). Per the directives, 'electrical and electronic equipment' or 'EEE' means equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for generation, transfer and measurement of such currents and fields.

As surface coating manufacturers we are not subject to these directives since we do not produce or sell electrical equipment; however, we have conducted trace element analysis on the critical raw materials to verify that we are compliant with the regulation. The coatings produced by United Protective Technologies, LLC (UPT) do not contain concentrations of the restricted material in amounts that exceed the regulated threshold limits. None of the restricted substances are knowingly added to our coatings by deposition processes or the raw materials used, as certified by material suppliers. Our manufacturing processes are not expected to introduce or create these substances.

UPT coatings do not exceed the allowable limits for the following 10 restricted materials:

- Lead (0.1 % by mass or 1000 ppm)
- Mercury (0.1 % by mass or 1000 ppm)
- Cadmium (0.01 % by mass or 100 ppm)
- Hexavalent chromium (0.1 % by mass or 1000 ppm)
- Polybrominated biphenyls (PBB) (0.1 % by mass or 1000 ppm)
- Polybrominated diphenyl ethers (PBDE) (0.1 % by mass or 1000 ppm)
- Bis(2-Ethylhexyl) phthalate (DEHP) (0.1 % by mass or 1000 ppm)
- Benzyl butyl phthalate (BBP) (0.1 % by mass or 1000 ppm)
- Dibutyl phthalate (DBP) (0.1 % by mass or 1000 ppm)
- Diisobutyl phthalate (DIBP) (0.1 % by mass or 1000 ppm)

Regards,
