LIVESTOCK SUPPLEMENT SYSTEM

#11684

**SWEETLIX® All- in- One Sheep and Goat Pressed**

### Features & Benefits

- Highly palatable supplement block for sheep consuming low quality forages
- Specifically designed to supplement small ruminants for optimum growth and reproduction
- Protein, vitamin, and mineral supplementation in one product.
- No additional sources of salt or minerals required
- Delivers 20% crude protein from all natural sources
- Ideal for all classes of sheep
- Convenient, easy to handle 33.3- lb. block
- Weather resistant block requires no special feeders or bunks

### Nutrient Guarantee

<b>Crude Protein, Min</b>	20.00%	<b>Copper, Min</b>	5 ppm
<b>Crude Fat, Min</b>	1.00%	<b>Copper, Max</b>	35 ppm
<b>Crude Fiber, Max</b>	6.00%	<b>Iodine, Min</b>	60 ppm
<b>Calcium, Min</b>	5.00%	<b>Manganese, Min</b>	1,700 ppm
<b>Calcium, Max</b>	6.00%	<b>Selenium, Min</b>	6.2 ppm
<b>Phosphorus, Min</b>	3.00%	<b>Zinc, Min</b>	1,700 ppm
<b>Salt, Min</b>	18.00%	<b>Vitamin A, Min</b>	100,000 IU/ lb
<b>Salt, Max</b>	21.00%	<b>Vitamin D-3, Min</b>	25,000 IU/ lb
<b>Potassium, Min</b>	1.00%	<b>Vitamin E, Min</b>	200 IU/ lb
<b>Cobalt, Min</b>	30 ppm		

### Product Ingredients

Plant Protein Products, Salt, Monocalcium Phosphate, Dicalcium Phosphate, Processed Grain By- Products, Molasses Products, Roughage Products, Calcium Carbonate, Calcium Hydroxide, Ferrous Sulfate, Manganous Oxide, Zinc Oxide, Manganese Sulfate, Sodium Selenite, Zinc Sulfate, Mineral Oil, Calcium Iodate, Cobalt Sulfate, Sodium Molybdate, Vitamin A Supplement, Vitamin D-3 Supplement and Vitamin E Supplement.

### Feeding Directions

**Introductory Period:** Following a 7 to 10 day acclimation period, average consumption should be 2 to 4 ounces for sheep and goats with unrestricted forage supplies. Position the blocks 50 to 75 feet from loafing, feeding and watering areas. Some repositioning of blocks may be necessary as animals become acclimated to the presence of the blocks. Move blocks closer to increase consumption: further away to decrease consumption. If over consumption occurs for more than two weeks and repositioning of blocks does not correct the situation, remove blocks and evaluate the overall feeding program. **DO NOT ALLOW STARVED ANIMALS FREE ACCESS TO THIS BLOCK.**

## Feeding and Management

1. Feed at a rate of one block per 5 to 10 head. All animals should have equal access to blocks. Timid and smaller animals need their share.
2. Place the blocks where animals congregate. Locate blocks throughout the pasture at loafing, grazing and watering areas. Adequate distance must be maintained between blocks to prevent crowding - 10 feet minimum.
3. Feed blocks continuously along with plentiful sources of forage and clean, fresh water. Animals should not run out of blocks. When a block is two-thirds consumed, provide a new block near it. Place very small pieces in a feed pan or trough to be clean up.
4. Sheep and goats should consume 2 to 4 ounces per head daily.
5. Consumption of this block may vary depending upon animal body condition, quality and quantity of forages, seasonal weather conditions, and most importantly, feeding locations of blocks with respect to loafing, grazing, feeding and watering areas.
6. Feed as the only FREE CHOICE source of salt, other minerals and vitamins.

For additional information, please contact your SWEETLIX® representative.

**CAUTION: Follow label directions.** Consumption of selenium should not exceed 0.7 mg per head daily.

This Product Information Sheet is not intended to replace the Product Label.  
Always read the Product Label for the most current nutrient content and feeding directions.
