## Acres Per Bag Conversion

These acres per bag figures were calculated by dividing 80,000 kernels per bag by the desired planting rate.

**Example:** If the desired planting rate is 26,000/acre, plant 3.1 acres per bag.

## Number of acres per 80,000 kernel bags for various populations

| Planting Pop | Acres Per Bag |
|--------------|---------------|
| 23,000       | 3.5           |
| 24,000       | 3.3           |
| 25,000       | 3.2           |
| 26,000       | 3.1           |
| 27,000       | 3.0           |
| 28,000       | 2.9           |
| 29,000       | 2.8           |
| 30,000       | 2.7           |
| 31,000       | 2.6           |
| 32,000       | 2.5           |
| 33,000       | 2.4           |
| 34,000       | 2.4           |
| 35,000       | 2.3           |
| 36,000       | 2.2           |
| 37,000       | 2.2           |
| 38,000       | 2.1           |
