

Flowtec AS announces a new distribution agreement with Graco High Pressure Equipment Company (HiP).

We are pleased to announce that Flowtec AS from September 2019 is an authorized distributor for Graco High Pressure Equipment Company (HiP). These products include Sprague air driven liquid Pumps and gas Boosters, eTensifier Electric Pump, and PT2020 PLS Controller.

Graco High Pressure Equipment Company (HiP) is a USA based company and a leading manufacturer for high quality components for pressure applications. HiP supply a complete line of Valves, Fittings, Pumps, Boosters and Accessories.

Flowtec AS is very pleased to expand its product range and HiP Sprague Pumps fits very much into our existing range and strategy for growth on both product sales and system/skid production.

This agreement gives Flowtec the ability to promote and distribute loose HiP Sprague Pumps and Boosters, and the opportunities to design and produce complete standard and custom-built system/skids for testing and flushing (liquid, gas and chemical).

We look forward to working with HiP and a future strong partnership.
