Underground Utility

The Natural Gas Utility & Pipeline Field Skills Training Program is designed as six weeks of pre-employment blended classroom and hands-on training that improves participant employability by providing basic understanding and awareness of field safety, underground utilities, and the natural gas industry.

Program Details:

- \$25 per day stipend
- Six week training period
- Monday thru Friday 9:00 AM - 2:00 PM
- Recognized Certificate of Completion
- Job fair upon graduation in which graduates will be able to apply for jobs and network with representatives of each partnering employer.

Our goal is twofold; to prepare program participants to obtain jobs with sustainable compensation and avenues for career path growth as well as to offer recurrent training to assist participants with the completion of employer required trainings.
