

# TRUCKS IN THE CONVOY

The historic military vehicles (HMVs) in the convoy are privately-owned by members of the Military Vehicle Preservation Association. As collectors we have an interest in preserving the important role these vehicles have played in our military history. HMVs are rated based on size. The 7 different truck sizes in the convoy are shown here. One WWII motorcycle will also participate in the convoy.

		<p>HMVs in the convoy range in age from the 1940's to 1990's. Collecting and restoring HMVs is part of the old car club hobby.</p> <p>Many collectors are veterans and found their interest in HMVs sparked as a result of their military service, while others are family members of veterans who grew up hearing stories about these amazing vehicles.</p>
