Project Title	Local Authority owned residential blocks in Shepherds Bush
Value	£75,000.00
Programme Duration	16 Weeks
Nature	Asbestos Removal
Client	Ayerst Environmental

About The Project

As part of the Local Authority's asbestos management plan the decision was taken to remove asbestos containing materials from residential units throughout the estate and Decontaminate were duly appointed. The cladding and panelling was typically located to risers within kitchen and hallway areas which meant that residents needed to be decanted from their properties during the works. The asbestos was carefully removed within the confines of a full enclosure to enable safe re-occupation by the residents upon completion of the work.

Material removed:

- Asbestos insulation board panelling

Project Challenges

- Working throughout live residential areas
- Care required to avoid unnecessary damage to property and decorations
- Working in a live residential environment
- Resident liaison and interaction
- Ensuring that work areas were established and cleared in a timely manner to enable re-occupation of the residential units
