

CONTROL BOXES

Control Systems are especially useful on installation that require two coolant heaters or combinations of a coolant heater and oil heater/hydraulic heater etc.

Function

Control Systems allow for quick electrical installation of all engine heaters. They are designed as a time and labour saving component.

Applications

Mining
Construction
Oil and Gas
Power Generation

Features

Reduced assembly and approval effort, thanks to ready-equipped control boxes

We process empty enclosures according to your requirements

Benefits

Get your custom junction box or control box quickly and from a single source

Also available for ATEX locations
