Reprints and Enlargements - From Digital files

Prints from ROES Digital Uncorrected

Professional Remote Order Entry Software

Files must be RGB, 8-bit JPEG or TIFF (Tiff's cannot be compressed) - we do not accept CMYK files. Uncorrected means that we do not correct your files. This service is for photographers who have a colour managed work flow and whose files do not need adjustments. No colour or density corrections will be made to the files and they must be in a standard colour space and tagged appropriately. Files are printed on Kodak Endura Professional paper with two lines of back print information. Please use the "**Digital Uncorrected**" section of ROES.

Digital Colour Corrected

While we always encourage photographers to be colour managed and deliver files that are consistent, sometimes you may want a second set of eyes looking at your order or files. We inspect every file in an attempt to achieve a uniform result over an entire order primarily adjusting density (lighter or darker) and colour (Red, Green or Blue). Files are printed on Kodak Endura professional paper with two lines of back print information. Please use the "**Colour Corrected**" tab section of ROES. All prints are made in a colour managed environment with careful calibration and profiling of our equipment. Prints are available Matte, Lustre or Glossy surface.

Fine Print

Print Size

Please be aware that all digital print sizes quoted are "nominal" and may vary up to 1/8 (3 mm) when unmounted and up to 3/16 (4.5 mm) when mounted. This slight reduction in size (about 1%) is necessary in order to print your picture to the edges of the paper. In order to get a consistent, even border on images sent to us with borders imbedded in the image, the minimum width of the outside border should be 3 to 4 mm. When mounting prints there is also a slight amount of image lost when we trim the mounting board flush to the print or create the bevel on plaque or float mounts hence the possible further reduction of image size.

File Names and Account name

When submitting orders through ROES, you are limited to 25 characters and the following are invalid characters and cannot be used in any part of a folder, file or account name: , " ^ & * = | < > ? () ' ~ /

Colour Space and Soft Proofing

Our ROES software is colour managed and can read all the embedded colour spaces (including sRGB, Adobe 1998, and Pro Photo RGB), it is our suggestion that only sRGB and Adobe 1998 are required. Most standard photography is well within the gamut of the two colour spaces but there are rare occasion where the very large colour space of Pro Photo may be required.

5 Business Days larger than 12x18

Prints made on Kodak paper ordered anytime from anywhere. You have many options and we invite you to use the one that is most convenient to you. Visit www.donsphoto.com or www.thelabworks.com from your mobile device or desktop computer. Download the iOS app from the iTunes store, or download and install the fully featured ROES software for desktop computers from the Don's Photo or The Lab Works site. We also invite you to order in person at any of our locations. The choice is yours.

Drymounting and Laminating

4 ADDITIONAL DAYS (NOT INCLUDING PRINT)

Foam-cor®: 3/16" thick lightweight board. Ideal for custom framing or short term mounting on its own. Available in black or white.

Gatorfoam®: 3/16" thick heavy-duty foam board. A more robust option which is less likely to bend or warp due to changes in humidity. Available in black or white.

3mm Sintra: Expanded rigid PVC board, very versatile substrate that unlike Foam-Cor or Gatorfoam can be curved or bent slightly.

Dibond: Archival - rigid - light - two pre-painted sheets of .012" aluminum with a solid polyethylene core mounted with Seal Print Mount 831 adhesive.

Laminating:

Perfect for Fine Art, photographic and plain paper media. They can be dusted or wiped with a damp cloth. . **Standard Laminate:** Lustre - Also available in Matte

Canvas - Fine Art Inkjet - Ready to Hang

10 BUSINESS DAYS

Using the latest inkjet technology we create stunning finished prints from your favorite images. Have your image wrap around the edge of the canvas, or finished with a white or black edge. All prints come ready to hang in the size you want. If there is a size you would like and you don't see it listed please ask.

We now offer a step-up to our inkjet Canvas offering with **Pro Satin PLUS** Canvas prints. First we start with heavyweight Breathing Color Crystalline Satin canvas and stretch on the Professional 1.75" frame. We then staple the material to the back and complete it with finish tape. The result is a stunning canvas print with a higher gloss, greater d-max and beautiful presentation.

Metal Prints - Ready to Hang

9 BUSINESS DAYS

Create unique prints on Chromaluxe® aluminum panels with a high gloss finish and a luminous quality. Metal printing is just that – printing on metal. We use a special high heat sublimation process resulting in images that have an amazing depth. These prints have a similar lifespan to traditional photographic prints. The Vibrant Glossy Metal prints have a white backing resulting in a traditional look, while the Brushed Metal Glossy print allows the brushed metal to show through on lighter areas of the image. All prints come ready to hang with smaller sizes having the option to come with an easel stand in place of a wall hanger.

Ready to Hang - Plaque, Floatmount and Acrylic Prints

10 BUSINESS DAYS

Plaquemounts are mounted on 3/8 inch thick MDF (wood) base with a beveled and hand painted black edge. Prints come with a UV laminate and a pre-cut slot on the back ready for hanging.

Floatmounts are mounted on 1/8 inch tempered Masonite and have a recessed back that makes the print appear to 'float' away from the wall. Prints are laminated with a UV laminate. Floatmounts are much lighter than Plaquemounts, and are therefore a great choice for mounting large prints.

Acrylic Prints Metallic prints are face-mounted on a clear Acrylic and then finished as a Floatmount, Plaquemount or Flushmount option. This method provides brilliance, depth, and an intensity unattainable by standard framing. Choose three options with 1/8 Acrylic and one option with 1/4 inch material.

Prices includes photographic print and laminate. All print surfaces are available. Prints must be laminated with one of your choice: matte, glossy, leather or canvas with matte the default

\$2.00 handling fee per image for cut 35mm and ALL 110, 126, 127, 620, and other odd sized transparencies for prints 12x18 and smaller.

Photo Calendars

6 BUSINESS DAYS

We offer three diverse calendar options. Our donsphoto.com online ordering system has a terrific variety of template options for Calendars. The first option is a 12 month press printed 11x8.5, center stapled calendar which is great for an every-day calendar. The second 11x8.5 calendar is center coil bound, on photographic paper and the images are sharper and more vibrant than the press calendar. The third option is a 12x18, 12 month , single sided calendar again on photographic paper. The press calendar is on paper stock and is the easient to write on if you want to make notes.

ITEM	DESCRIPTION	PRICE
12 Month press printed calendar	12 months on 8.5"x11" press printed, stapled in the center.	\$27.95
12 Month Photographic paper 11x8.5	12 months on 8.5"x11" photographic paper, coil bound center.	\$44.95
12 Month Photographic paper 12x18	12 months on 12x18 Kodak Endura paper, coil bound top.	\$44.95

* there is a \$10.00 per order charge on calendar orders from prints, negative or slides.

Photo Books

7 BUSINESS DAYS

We offer four types of press printed books. 10x8 Faux Leather hardcover with window on front cover, Prestige 6x6 softcover book, Prestige Hardcover book (9x7 and 8.5x11) and a Prestige Layflat book (6x6, 8x8, 10x10 and 12x12). All books start with 20 pages and can be added to. Visit www.donsphoto.com to order.

ITEM	DESCRIPTION	PRICE	EXTRA PAGES

Bulk Print Scanning

4 BUSINESS DAYS

The most inexpensive method of scanning prints. These scans are suitable for viewing images on a computer and making smaller print sizes. Scans from photographic prints ranging in size from wallets to 8x10, in colour or B&W results in JPEG files at 300 dpi resolution, with low compression. All images are returned on a CD. Prints cannot be smaller than 2.5x3.5 inches, and cannot be mounted or on paper thicker than normal photographic paper. Images should also be free of dust, free of tears, tape, staples, and any other defect that can interfere with the scan.

Note: Prints are grouped by size prior to scanning making it very difficult if not impossible to keep them in a specific order. For that reason we do not offer to keep prints in order with this service.

# OF SCANS	1 SIDED	2 SIDED
50-199 (minimum order of 50 or \$19.50)	\$0.38	\$0.47
200-499	\$0.27	\$0.33
Shoebox Scan*	\$118.99	\$135.99

*Bring in a standard shoebox filled with pictures and we'll scan every print in the box for one low price.

NEW - The cost of CD is included in the scanning price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Consumer Film Scans

1-3 BUSINESS DAYS

The most economical way to transfer negatives or slides to digital format. This service is available from 35mm, APS and 120 film. We can scan your roll at the time of developing, or from your existing negatives or slides.

	135	120-6x4.5	120-6x6	120-6x7
Medium Resolution	1024x1536 (4.5MB)	1324x1024 (3.9 MB)	1024x1024 (3 MB)	1024x1255 (3.7 MB)
High Resolution	2048x3072 (18 MB)	2645x2048 (15.5 MB)	2048x2048 (12 MB)	2048x2510 (14.8 MB)

FILM	PER ROLL <i>(at time of develop)</i>	1-9*	10-24*	25-49*	50-99*	100+*
135 or 120 film Medium resolution	\$5.00	\$1.75	\$1.50	\$1.25	\$1.00	\$0.65
135 or 120 High resolution	\$10.00	\$2.50	\$2.25	\$2.00	\$1.75	\$1.00
220 Medium Res	\$5.00	\$1.75	\$1.50	\$1.25	\$1.00	\$0.65
220 High Res	\$15.00	\$2.50	\$2.25	\$2.00	\$1.75	\$1.00

* Additional charge from individual unmounted slides or cut negatives

These scans crop 2mm around the edge of the frame, very full images with text should be Pro Scanned.

NEW - The cost of CD is included in the scanning price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Pro Scans From Neg or Print

3 BUSINESS DAYS

Pro Scans are for when you need to step it up a little. We scan Colour or B&W negatives, slides and prints. These RGB, 8 Bit, Adobe 1998 scans are processed with digital ice (colour only -Digital Ice does not work with B&W film) and dust busted in Photoshop. Each file is carefully optimized and saved as a tiff onto a CD.

RESOLUTION SPECS FOR 35MM FILM		PRINT SIZE @ XX DPI		TIFF SIZE	FILES PER CD	Save Images To 8 GB USB Add \$8.00

NEW - The cost of CD is included in the scanning price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Digital Copy Negative and Oversized Digital Copy Negative

4-10 BUSINESS DAYS

We can copy up to 11x14 and anything oversize (above 11x14) such as photographs, paintings, artwork up to 20 x 40 inches. All work is done in a controlled environment producing excellent digital copies of original pieces. A copy of the digital file is given to you on CD.

ITEM	DESCRIPTION	PRICE
Digital Copy Negative	Print to CD - up to 11x17	\$7.00
Digital Copy Negative Oversized	Print to CD - Original larger than 11x17 to a max of 20x40 inches	\$30.00

The cost of CD is included in the scanning price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Professional Digital Copywork/Retouching

7 BUSINESS DAYS

Bring your original and we'll capture it digitally, make any colour management decisions required and provide you with a proof for your approval. The image can then be output to your specifications. This service is designed for originals such as paintings where colour fidelity in each tone is paramount as our experts painstakingly adjust each channel for optimum matching. Additionally, specialized digital work can be quoted on a per hour basis. It is best to visit us in person to discuss your needs. Choose to have images back on CD (included in the price) or onto a 8 GB USB for an additional \$8.00

Service	Price
Originals to 16x20	\$80.00
Digital retouching work	Quoted on a per job basis \$80.00/hr

NEW - The cost of CD is included in the scanning price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Photo Restoration and Manipulation

5-7 BUSINESS DAYS

We restore old photographs. Using the latest digital imaging equipment we restore tears, blemishes, cracks, faded colour and density. We can remove or add people, or other elements, to the photographs, with no harm to the original photograph. All work is saved to a digital file and returned to you on a CD. We have created five categories of retouching, and the price of the job is quoted before any work is started.

RESTORATION	LIGHT	MEDIUM	MED-HEAVY	HEAVY	GROUP HEAVY
Retouching Level	\$30.00	\$48.00	\$65.00	\$79.00	\$99.00

NEW - The cost of CD is included in the Restoration price or you can have images returned on 8 GB USB 2.0 for an additional \$8.00

Data Recovery

3-5 BUSINESS DAYS

All services are for a basic memory card recovery, no customer editing allowed during the process. Data recovery can be performed on most types of memory cards (SD, CF, Memory Stick, XD etc.) There is no guarantee that we can get the files back, some cards are too corrupt or formatted to recover the files. In the event that no files can be recovered, there will be no charge for the service.

SIZE OF CARD	DESCRIPTION	PRICE
Up to 16GB card	Includes recovered data on Sandisk 16 GB USB	\$50.00
32GB card	Includes recovered data on Sandisk 16 GB USB	\$70.00
64GB card	Includes recovered data on Sandisk 32 GB USB	\$120.00
128GB card	Includes recovered data on Sandisk 128 GB USB	\$190.00

Video Transfers: Tape to DVD or Hard Drive (MP4)

4 WEEKS

We transfer to USB or to DVD. In most cases in today's world you will receive a better quality transfer and more universal file format if you have your VHS or old movie film transferred to Mpeg4 file format on USB or supplied hard drive. Yes, we can have a transfer made into a traditional DVD but you are limited in what you are getting. We can also transfer to other file formats such as .mov on request. For transfers to MP4 a blank hard drive must be supplied by the customer. Approximately 1 GB of storage is needed for each hour of video.

DVDs or digital files to hard disc can be made from VHS, s-VHS, VHS-c, 8mm video, hi-8 video, digital 8 video, mini-dv, mini DVD, SD cards and Betamax. (PAL Mini DV transfers are not available). Each tape transferred to DVD is a single chapter and has a separate chapter title that appears in the menu. Custom chapter titling is generally not offered, but can be provided. Chapter titles are limited to 18 characters. An additional fee may apply.

It is possible to put more than two hours onto a DVD, but the quality will suffer and the price will not be any less than utilizing more than one DVD to maximize quality.

DESCRIPTION OF SERVICE	PRICE DVD	PRICE MP4
Single tape or DVD to archival DVD - Up to 2 hours	\$36.00	\$36.00
Combined tapes and/or DVDs to archival DVD - Up to 2 hours*	\$50.00	
Extra DVD copy (not applicable to transfers to Hard Drive)**	\$15.00	

*Video can be combined to a single DVD for up to 4 separate original tapes or DVDs only.

**The extra copy price is only provided at the time of the initial order.

For future copies, the DVD made during the previous work must be supplied in order to make a copy.

Video Tape Repair

4 WEEKS

Most physically damaged video cassettes can be repaired or spliced. When repairing the actual tape, damaged portions must be removed.

If a tape requires a physical splice, it is highly recommended that it be copied to DVD or digital file (see above video transfer prices) and not played in a VCR. Splices made to video tapes are likely to create a head clog, meaning the VCR must be opened and cleaned.

DESCRIPTION OF SERVICE	PRICE
Splice video tape	20.00
Replace cassette shell (add to above price is necessary)	20.00

Video Transfers: Foreign Video

4 WEEKS

Foreign tape (VHS only) and DVD conversions can be done, to and from foreign source, to and from North American DVD (NTCS).

It is possible to convert *most* foreign DVDs to North American standard DVDs, *but not all*. Not only are there different video standards, there are also different regional standards and some manufacturers of DVD camcorders have added copy guard to their internal recording software. This is not an issue of copyright, but an issue of companies trying to encourage brand loyalty... not all can be dealt with. DVDs recorded in a Sony Camcorder are particularly of issue.

Some artifacting may occur in the converting process. Scenes with a lot of movement can lose some fluidity.

Digital Files for foreign conversions (SD AVI or SD MOV) are available upon request.

DESCRIPTION OF SERVICE	PRICE DVD	PRICE MP4
Up to 2 hours	\$56.00	\$36.00
Combine 2-4 sources up to 2 hours	\$50.00	\$50.00

Customers must sign off and take responsibility for any copyright material.

No extra copy rate. Full price for additional copies.

Video Transfers: Home Movies

4 WEEKS

All motion film is transferred on new frame-by-frame transfer units. These units basically take a 1920x1080 hi res scan of every individual frame and those frames are reassembled into a playable video file. These individual jpeg images of each frame are what are known as the Master Image Sequence (MIS) . A MIS is perfect for the customer who wants a backup that will allow them high quality, flexible format that can be easily converted to other formats in the future. Each reel of film will have it's own folder with each and every frame of that reel accessible as a jpeg file.

Suggested transfer it to HD - MP4 or HD - .MOV. You can request having transferred to DVD (SD) but that will be of lower quality. Transfers to MP4 or .MOV require a flash drive or external hard drive. A quick rule of thumb is that you will need about 4 GB of storage for every 50' reel of film that you are having transferred. This drive must accompany the order or there may be delays in completion of the order while a drive is sourced.

Each new reel of film being transferred to DVD will have a new chapter title on the DVD menu. Chapter titles can be provided by the customer (up to 2 rows of 20 characters for each reel of film). If a chapter title is not provided we will title the chapter with the number in which they were transferred. Efforts are made to try and place film in chronological order is possible.

Minor film repair is done at no charge. If extensive repairs must be done, you will be notified of any extra charges before we proceed.

Prices are on the amount of film that is on a reel. If the reel is full, follow the guide below for pricing, in reference to the diameter of the reel. If reels are not full, the price is charged by the nearest higher increment (i.e. a 400 foot reel with only 250 feet of film on it will be charged for 300 feet). Over-stacked reels will be charged accordingly for a larger sized reel.

Additional copies must be ordered at the time of transfer. Extra copies at a later time are \$25.00 for the first copy, and \$15.00 for additional copies. Extra copies of film transfers can be made without the original DVD provided it is done within 12 months of the original transfer.

DESCRIPTION OF SERVICE	FILE or DVD
50 foot reel or less	\$24.00
100 foot reel	\$45.00
200 foot reel	\$90.00
300 foot reel	\$130.00
400 foot reel	\$170.00
over 400 feet	\$0.40/foot

Minimum Charge of \$35.00 per order.

Chapter Titles: \$3.00 per title (plus reorganization price if applicable).
Extra Copy DVD - \$15.00

(Very) Old Film Developing

10-12 WEEKS

With exception to 35mm long roll motion picture film, all film can be developed regardless of its format and age.

All still film, once developed is scanned, digitally enhanced, is burned to CD.

After developing, it is recommended that motion picture film be transferred to DVD or Digital File (AVI or MOV). Much of the motion picture film is developed into a B&W negative in order to salvage something from it. Some form of transfer in these cases is necessary so that it is viewable by the customer.

Though most types of film can be developed, the quality and success rates depend on many factors. Some films tend to come out very well, some okay, and some very poor. It must be noted that these films are often decades beyond their expiry dates. See lab for more information with specific details as to the film brand, format, and exact type. Kodachrome film can only be processed to Black and White.

The retrieval of recognizable images from still film is guaranteed or there is no charge. "Recognizable" does not mean "of good quality", it only means that there is a physical image within the frame of the negative.

Depending on when the film is received, processing may take up to 6-8 weeks.

DESCRIPTION OF SERVICE	PRICE
All still film developing (except Disc film)	\$80.00
Motion film	\$59.00
Disc film	\$50.00
Prints from Disc film (already developed)*	\$45.00

*Disc film scans are 2400dpi. Though fairly high resolution, the negatives are so very small, and digital artifacting will show up on prints over 5x7

Policy Guide**Pricing**

Prices contained in the "The Lab Works/Don's Photo Price Guide" are intended for Portrait, Wedding, Industrial, Commercial, and high volume users of Photofinishing services. All prices listed are net. To be eligible for the prices listed in the "The Lab Works/Don's Photo Price Guide" it is suggested that you have a yearly Photofinishing volume of \$500 before taxes. We reserve the right to review your yearly volume on an annual basis. Pricing and services are subject to change without notice. Inquiries for any adjustments or discrepancies must be made within 30 days. All other "terms and conditions" of sale apply.

Shipping

All orders are F.O.B. The Lab Works . If requested we can ship for a nominal rate.

Taxes

All orders are subject to Federal and Provincial taxes in accordance with Federal and Provincial guidelines. Tax numbers must be provided in cases where requesting tax exempt status.

Limit of Liability

We take great care to ensure the safety of your files and film but the possibility of errors exist even with the greatest care and attention to detail. By submitting slides, prints, negatives, artwork or digital files to us for processing you are entering and AGREEMENT that any damage or loss by The Lab Works, any affiliated companies or agents (even due to negligence or fault) will entitle you to replacement with a like amount of unexposed film, processing or Blank CD's. Except for such replacement, the acceptance by us of your slides, prints, negatives, artwork or digital files is without warranty or liability and recovery for any damages, including special incidental, consequential or punitive damage excluded.

Copyright

The Lab Works/Don's Photo policy is to not copy any artwork that is stamped, marked or otherwise identified as a copy written work. And while we aim to protect photogrpahers rights at all times, the Canadian Copyright act was ammended to include provisions to copy photographs for personal use.

Return Orders

If an order has not been completed to your satisfaction, please return the prints in the same condition as received along with the original order envelope, negative and/or files. If the error is our we will promptly remake or correct the prints. Credits or refunds are not available.

Volume Rebates

Customer with annual photofinishing volume in excess of \$2,500 may qualify for a volume rebate. Rebates will be paid in January as a credit on your account or gift card in the rebate amount. The following criteria must be met to qualify: 1) Your account must be current and in good standing in accordance with The Lab Works/Don's Photo Terms and Conditions by December 31st 2)Your pretax Photofinishing volume must exceed \$2,500. Hardware and consumable sales do not qualify for the Photofinishing volume rebate. Rebates will be calculated as follows:

\$2,500 - \$4,999.....	2% rebate
\$5,000 - \$9,999.....	3% rebate
\$10,000 - \$14,999.....	5% rebate
\$15,000 - \$24,999.....	8% rebate
