Introduction: Factories Basic Info

889 Global Solutions works with several factories that manufacture medical devices and components that went through the **510k FDA submission and approval process**. With their certified ISO-13485 and ISO 9001 management control, they have excellent quality assurance on manufacturing more than 20 CE certified products.

The key focus for them are on design, develop, manufacture and distribute of quality disposable medical products to global customers. The factories strive to uphold the reputation of being a professional leading medical product supplier with a good reputation both on the domestic and global markets.

Main products includes medical disposables such catheters, tubes, syringes and nebulizer.

Introduction: Structure & Capabilities

Factories Size:

- Between 80,000 to 130,000 square feet

Cleanroom Area:

- 30,000 to 60,000 square feet (class 100,000)
- > 2,000 square meters (class 10,000)

Major Markets in USA, Europe & China (80% Export)

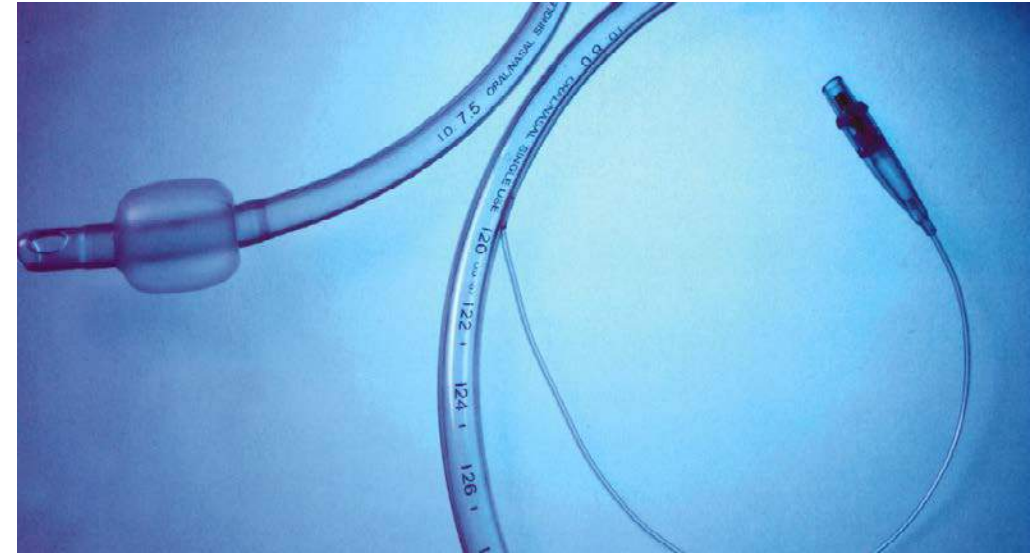

Total Employee: Between 200 to 800

Certification:

- China CFDA, FDA 510K, CE, ISO 13485, ISO 11135, ISO 9001

Capabilities:

- Small ID & OD extrusion with tight tolerance requirements
- Multiple lumens extrusion
- Soft material injection with good control
- Processing TPU material including extrusion, injection, tipping, and eyelets polish etc.

Facilities

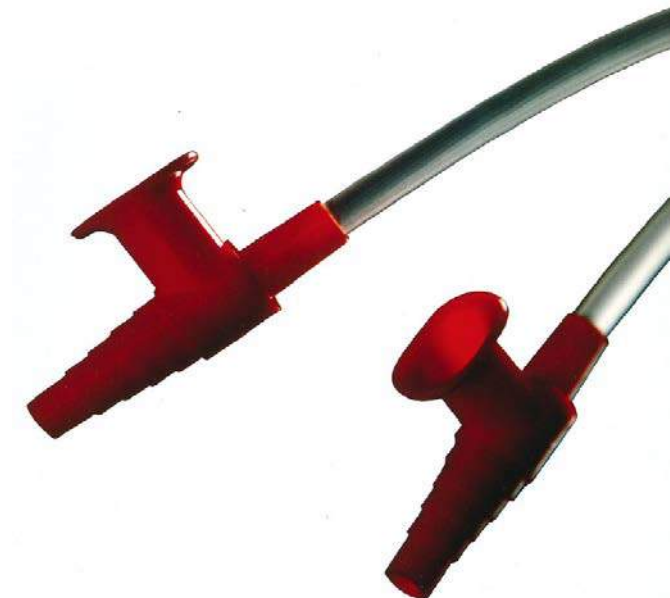

Equipment

- Extruding Machines
- Injection Machines
- Silicone Injection Machines
- Tipping Machines
- Eyelet Operating Machine
- Automatic Packaging Machine

Sterilizing Facility

- Total area: 30,000 square feet
- Sterilization Chambers: 3 chambers
- Chamber Volume: 15 m3 each, totally 45 m3
- Sterilization Capacity: more than 10,000 m3 annually
- Laboratory: Microbiology Laboratory (Sterile Lab & Positive Control Lab)

510k Products - Catheter

Central Venous Catheter

Two hub-shape options:

- Round hub to reduce friction against the skin.
- Triangle hub available for international market.

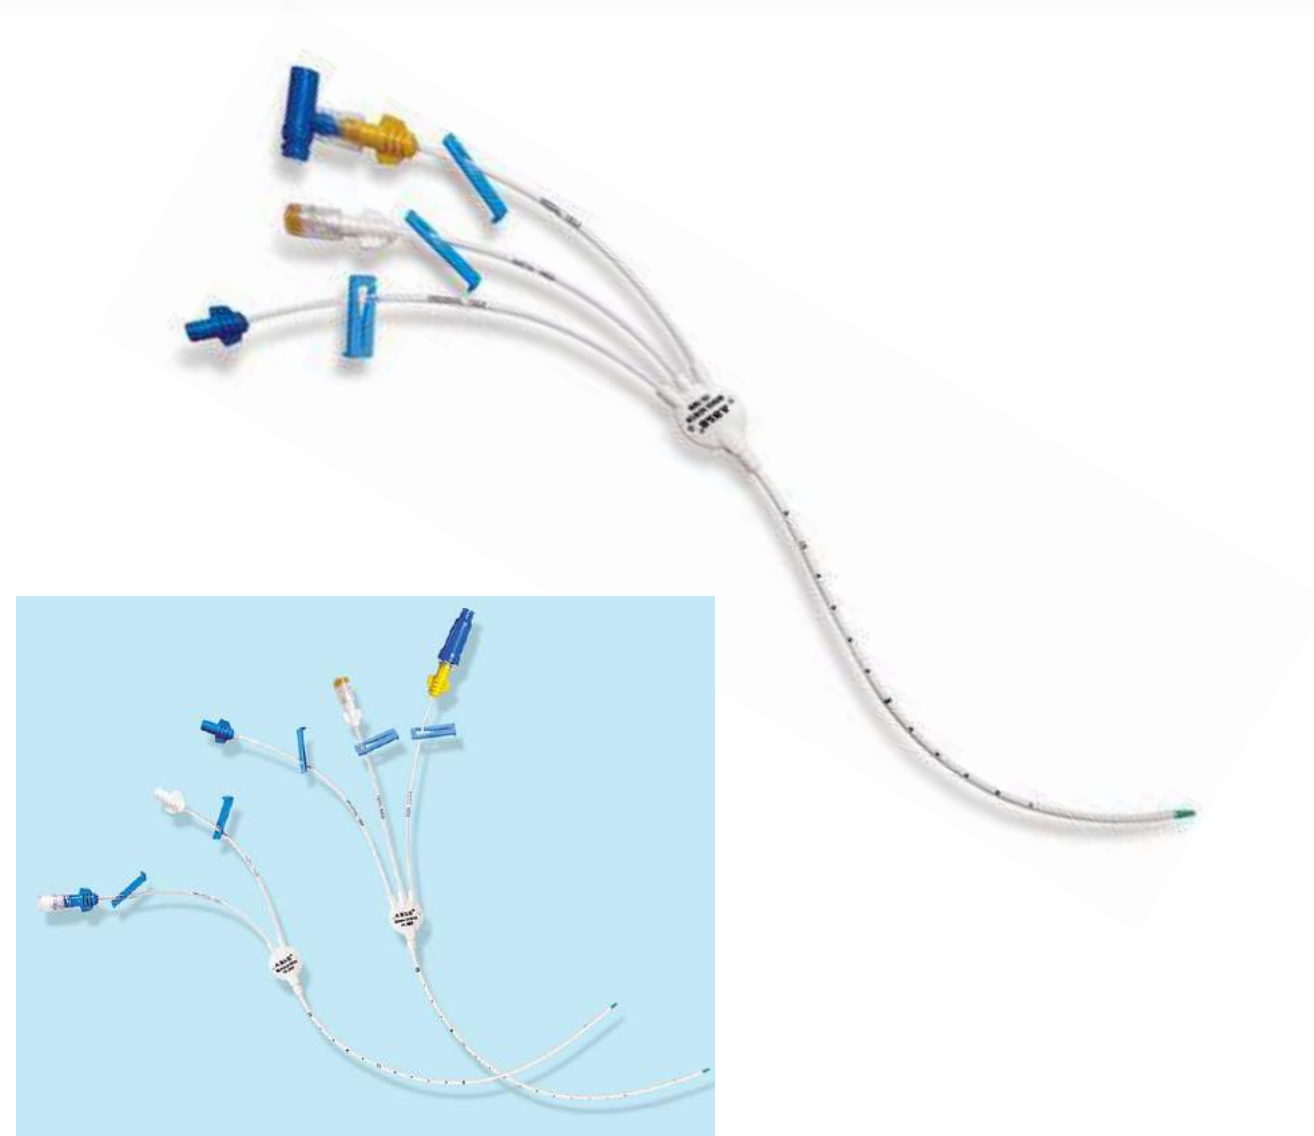

Specialized PU material that will become 50% softer under body temperature (37°C), after insertion into the body.

Component consists of:

- Nitinol guide-wire
- ECG Cable
- Y shaped needle
- Blue Syringe

510k Products - Catheter

Hemodialysis Catheter

- Two Extension tube options
- Special PU material makes tubing more flexible.
- Radiopaque tubing facilitates visualization under X-Ray.

Component consists of:

- Nitinol guide-wire
- ECG Cable
- Y shaped needle
- Blue Syringe

Side Holes

2.5 cm end-hole reduces recycling and wall-suction & minimizes risk of clot formation

510k Products - Catheter

Foley Catheter

- Superior slippery coating on surface
- Biocompatibility

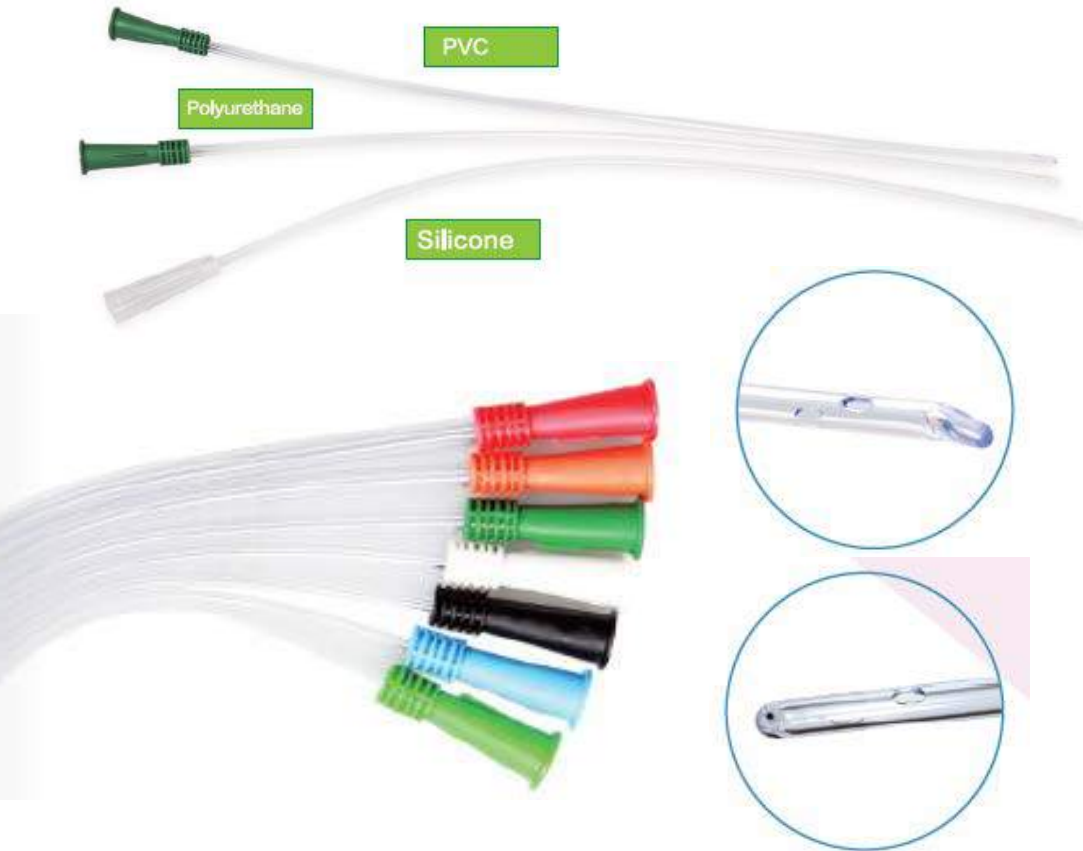

Hydrophilic Urinary Catheter (with/without water sachet)

- Hydrophilic coating on surface makes the catheter slippery after contact with liquid, creating minimal friction during insertion and removal.
- Offers users greater comfort and minimal risk of urethral micro-trauma.

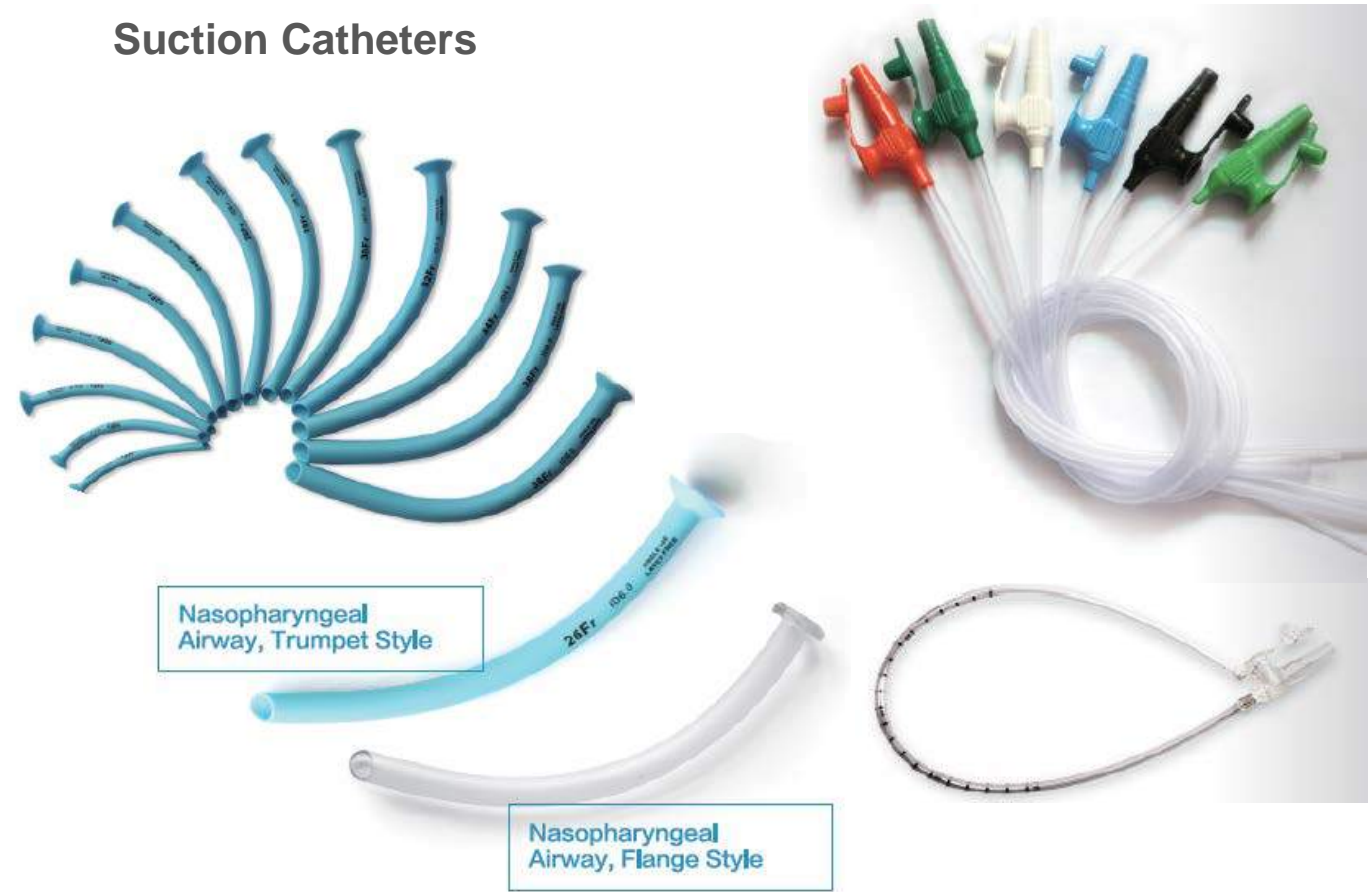

510k Products - Catheter

Intermittent Catheter

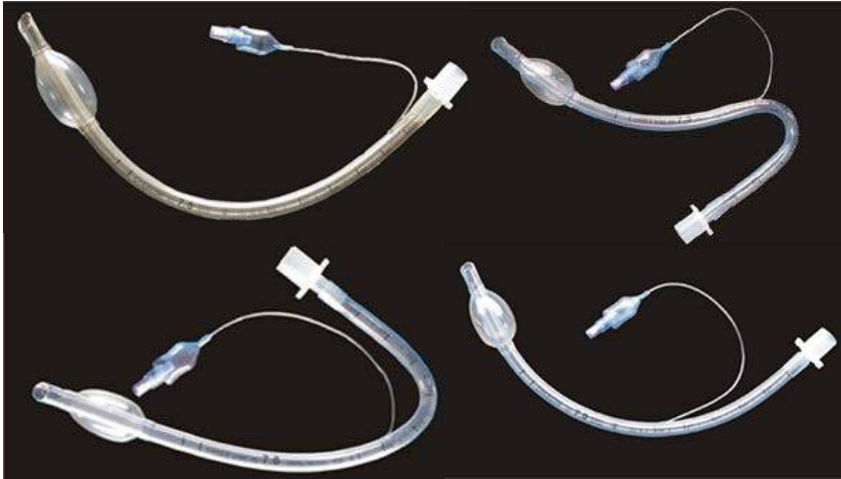

Suction Catheters

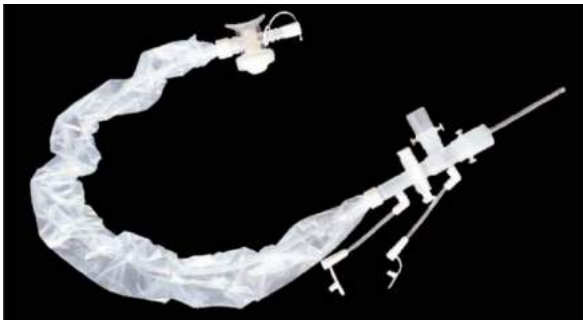

510k Products - Others

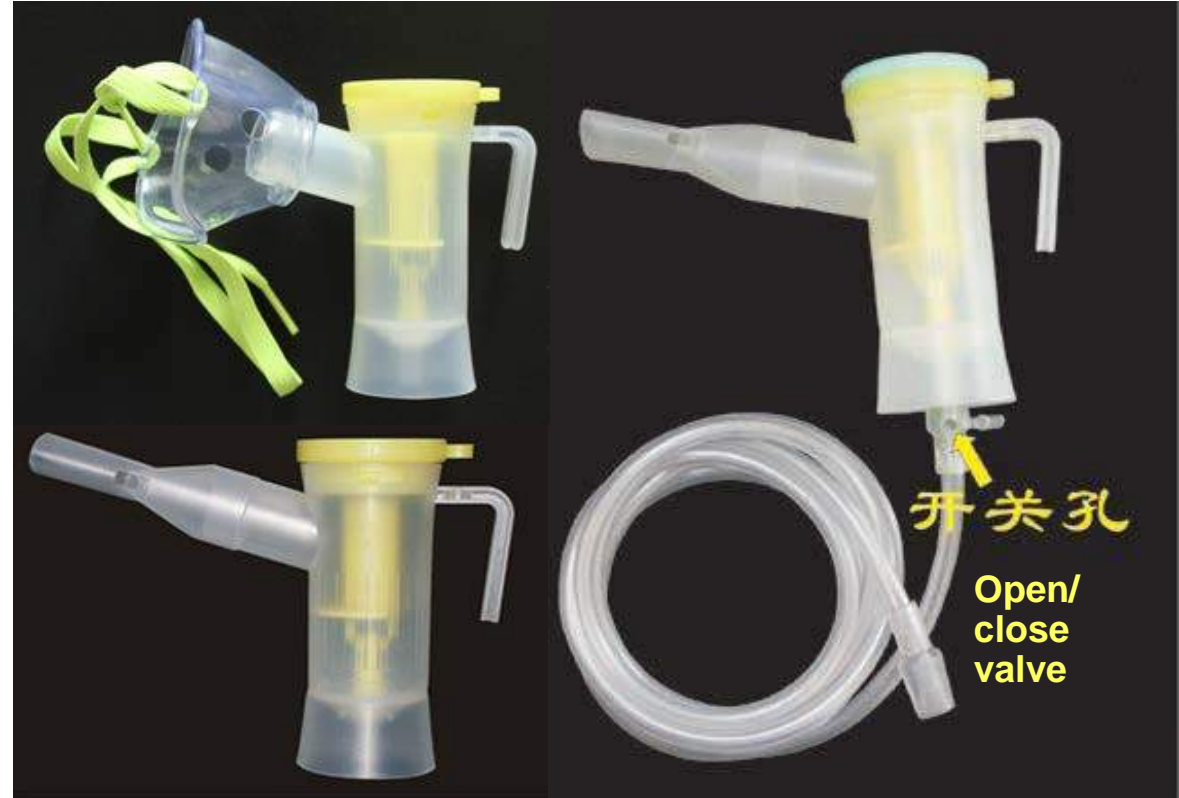

Tracheal Tube

Suction System

Nebulizer

510k Products – Syringe & Needles

Enteral Syringe

Tuberculin Syringe

Huber Needle

Intravenous Needle Set

Safety Insulin Syringe

Allergy Syringe

Insulin Pen Needles

Medical Needles

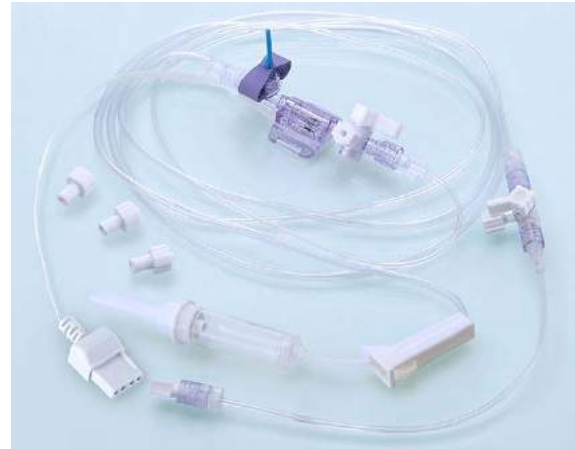

Other Products

- Pressure Transducer
- Drainage Catheter
- Stopcock
- Feeding Tube
- Injection Adapter
- Needle Free Connector

- Endotracheal tubes
- HMEF, Adult & Pediatric

Other Products

Our vendor base includes medical machining for:

- Endoscopy Accessories
- Connector Tubes
- Medical Equipment Parts
- Connector Tubes
