INFRASTRUCTURE ENGINEER / ADMINISTRATOR (60 % - 100 %)

Job Description:

If you are a passionate and flexible Infrastructure Engineer and/or Administrator with a holistic view, who likes breakthrough challenges and who is keen to join a fast-growing and forward-looking Swiss start-up, then we'd love to hear from you.

In this role, you'll be responsible for the existing infrastructure which is mostly self-hosted as well as improving the stability and efficiency - in regards of maintainability and from the user.

As with all start-ups, the work is often ground-breaking, exciting and purposeful, but requires belief, dedication and sometimes long or irregular hours. The fun is in doing it as part of an equally enthusiastic and positive, close-knit team who all have a common goal.

Your place of work will be the heart of Zurich and remote.

Job responsibilities:

- Maintaining the existing infrastructure which is mostly self-hosted (e.g. email-, file-, web-server, databases, wiki,)
- Improving existing infrastructure in regards of integration, automation, HAV
- Creating and maintaining process documentation for internal Wiki (in English)
- Training and supporting internal users
- *Optional: DevOps support (docker, CI, CD)*

Skills:

- Sound knowledge and proficiency in Linux (RedHat/CentOS)
- Experience with databases and networks
- Knowledge of system security (e.g. intrusion detection systems) and data backup/recovery
- Knowledge of macOS/iOS (Windows knowledge not needed)
- Enjoying and having a flair for writing documentations
- Experience with Cloud-Infrastructure and Cluster-Setup
- Experience in working in geographically distributed teams and agile methodologies
- Fluency in German and English required
- *Optional: Hadoop/big-data knowledge*
