Environmental Performance Reporting

Make the transition to a resource-efficient economy.

- Track and reduce organisational emissions
- Understand and optimise raw material usage
- Automate and schedule regular reports
- Monitor performance against reduction targets
- Meet corporate social responsibility targets

More Than *Just* Tracking Emissions

AVA's EPR module doesn't just help you to track your raw material consumption and carbon footprint. It helps you to reduce them.

Whether your goal is to reduce water usage, electricity consumption or any other raw material consumption - AVA help you to identify areas for improvement, set remedial actions and see them through to completion.

Targeted Usage Campaigns

Meet your CSR goals by tracking and then reducing consumption and emissions. AVA's incredible data visualisation tools give you a helicopter view of where you need to focus your emissions campaigns - by region, country or right down to site level. You can then quickly identify top and bottom performers and target campaigns accordingly.

Intelligent Alerts

AVA's EPR module can do much of the monthly emissions tracking for you.

AVA can alert you when you emissions or usage hit editable thresholds. Ensuring you can stay up to date if usage goes above acceptable levels, or if it reduces to your target.

Select a Site

Drag and drop your meter readings in Microsoft Excel format here or select them below.

Key Benefits

Scale Environmental & Fiscal Savings

For organisations large and small - AVA's EPR module helps you to save the environment and improve your balance sheet.

Using AVA's hierarchical site structure, managers can see what works at site level, and then scale successful campaigns all the way to global level.

Turn Insight Into Action

AVA's EPR module helps you cut emissions - not just through analysis - but through action. Action Tracking is seamlessly integrated through all AVA modules - so you can set actions, manage campaigns and track them through to completion - all from within AVA's ease to use interface.

Never Miss a Reading

AVA's scheduler can help you to manage reading dates. Timely reminders and various input methods - including Microsoft Excel upload - ensure all readings are entered on time.

For all overdue readings - reminders, alerts and AVA's in-built Action Tracking and Workflow Engine, ensure they won't be overdue for long.

Demonstrable Environmental Compliance

AVA's data visualisation tools are the perfect opportunity to demonstrate compliance. Use AVA's market leading Dashboards and Reporting module to provide executives and regulatory bodies with the information they need.

Key Features

Measure & Manage Consumption

- Input consumption figures easily
- Configure units with inbuilt converter
- Create an unlimited number of data capture templates

Configurable Workflows

- Workflows power all actions in AVA
- Use Workflows to set or escalate actions
- Take ownership of consumption reduction across your entire organisation

Query Builder

- Slice and dice your data to understand the metrics important to you
- Use rolling date ranges for real-time reporting
- Save queries and add them to dashboard

Data Visualisation

- Establish patterns and common emission spikes
- Visualise data as tiles or best practice graph styles
- Create EPR-specific dashboards
- Share dashboards with any other AVA user

Environmental KPIs

- Set intelligent usage alerts
- DEFRA greenhouse gas emission factors
- Intensity ration reporting
- Definable scope for direct and indirect emissions
