Audit Management

Automated. Configurable. Easy to use.
Our Audit Management module can be tailored to meet the auditing needs of any organisation.

- Conduct audits with our dedicated mobile app
- Build a library of best practice audit templates
- Automate and schedule regular audits
- Create corrective and proactive actions off the back of audit findings
- Visual audit data in tiles, graphs and reports

Conduct Audits. Analyse Results

Interpreting audit data from paper, spreadsheets or even legacy EHS systems often means duplicated work and difficult to analyse results. AVA helps you to find meaning in your audit data.

Ask new questions, spot trends, identify opportunities to be proactive, and make data-driven decisions with confidence.

Unpresidented Audit Insight

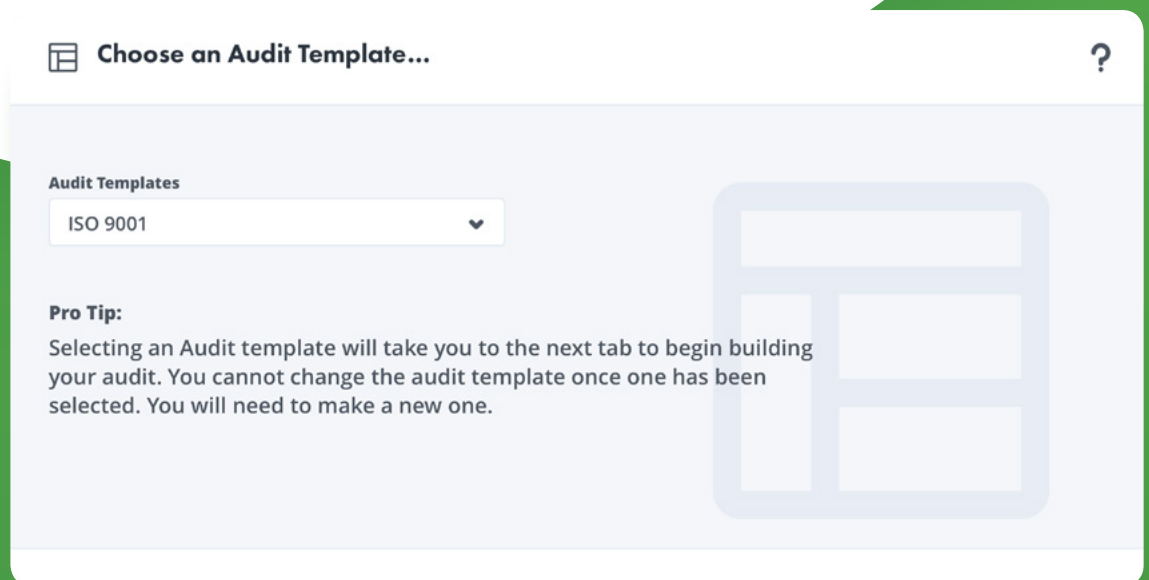

All AVA modules are underpinned by a powerful graph database. Graph databases make connections between data better than any other kind of database.

AVA will be able to understand your audit data and understand the underlying causes behind it.

Configurability Guaranteed

AVA Audit Management - like all AVA modules - is highly configurable.

Create and configure anything from form layouts, scoring methods to checklists, questionnaires and scoring rules.

Key Benefits

Mobile First Approach

Our mobile first philosophy means Audit Management works best on mobile devices. Log audit results directly into AVA to reduce work duplication and paper consumption.

No Signal? No problem. Mobile audits work offline and sync up when signal becomes available.

Audits Mean Action

AVA's modular system helps you to drive real change. Use audits to identify corrective or even proactive actions. Assign actions and then track them through to completion with automated notifications and clear escalation routes.

Schedule Your Audit Programme

Make proactive safety decisions to keep your workforce safe. Use audit data to spot patterns and set alerts when key thresholds are reached.

AVA's unparalleled configurability means you can slice and dice your data in a multitude of ways - ensuring the decisions you make are the right ones.

Meet Regulatory Compliance

Meet regulatory compliance requirements - including ISO and OSHA requirements. Build libraries of audit templates to cater for any situation.

Key Features

Configurable Templates

- Tailor templates to meet your requirements
- Configure scoring methods, checklists and more
- Create an unlimited number of audit templates
- Meet ISO / OSHA / IAP regulatory compliance

Mobile

- Dedicated iOS and Android apps
- Purpose built for mobile to ensure ease of use
- Reduce work duplication
- Work online or offline. Sync audits to AVA when connections become available

Track Non-Conformances

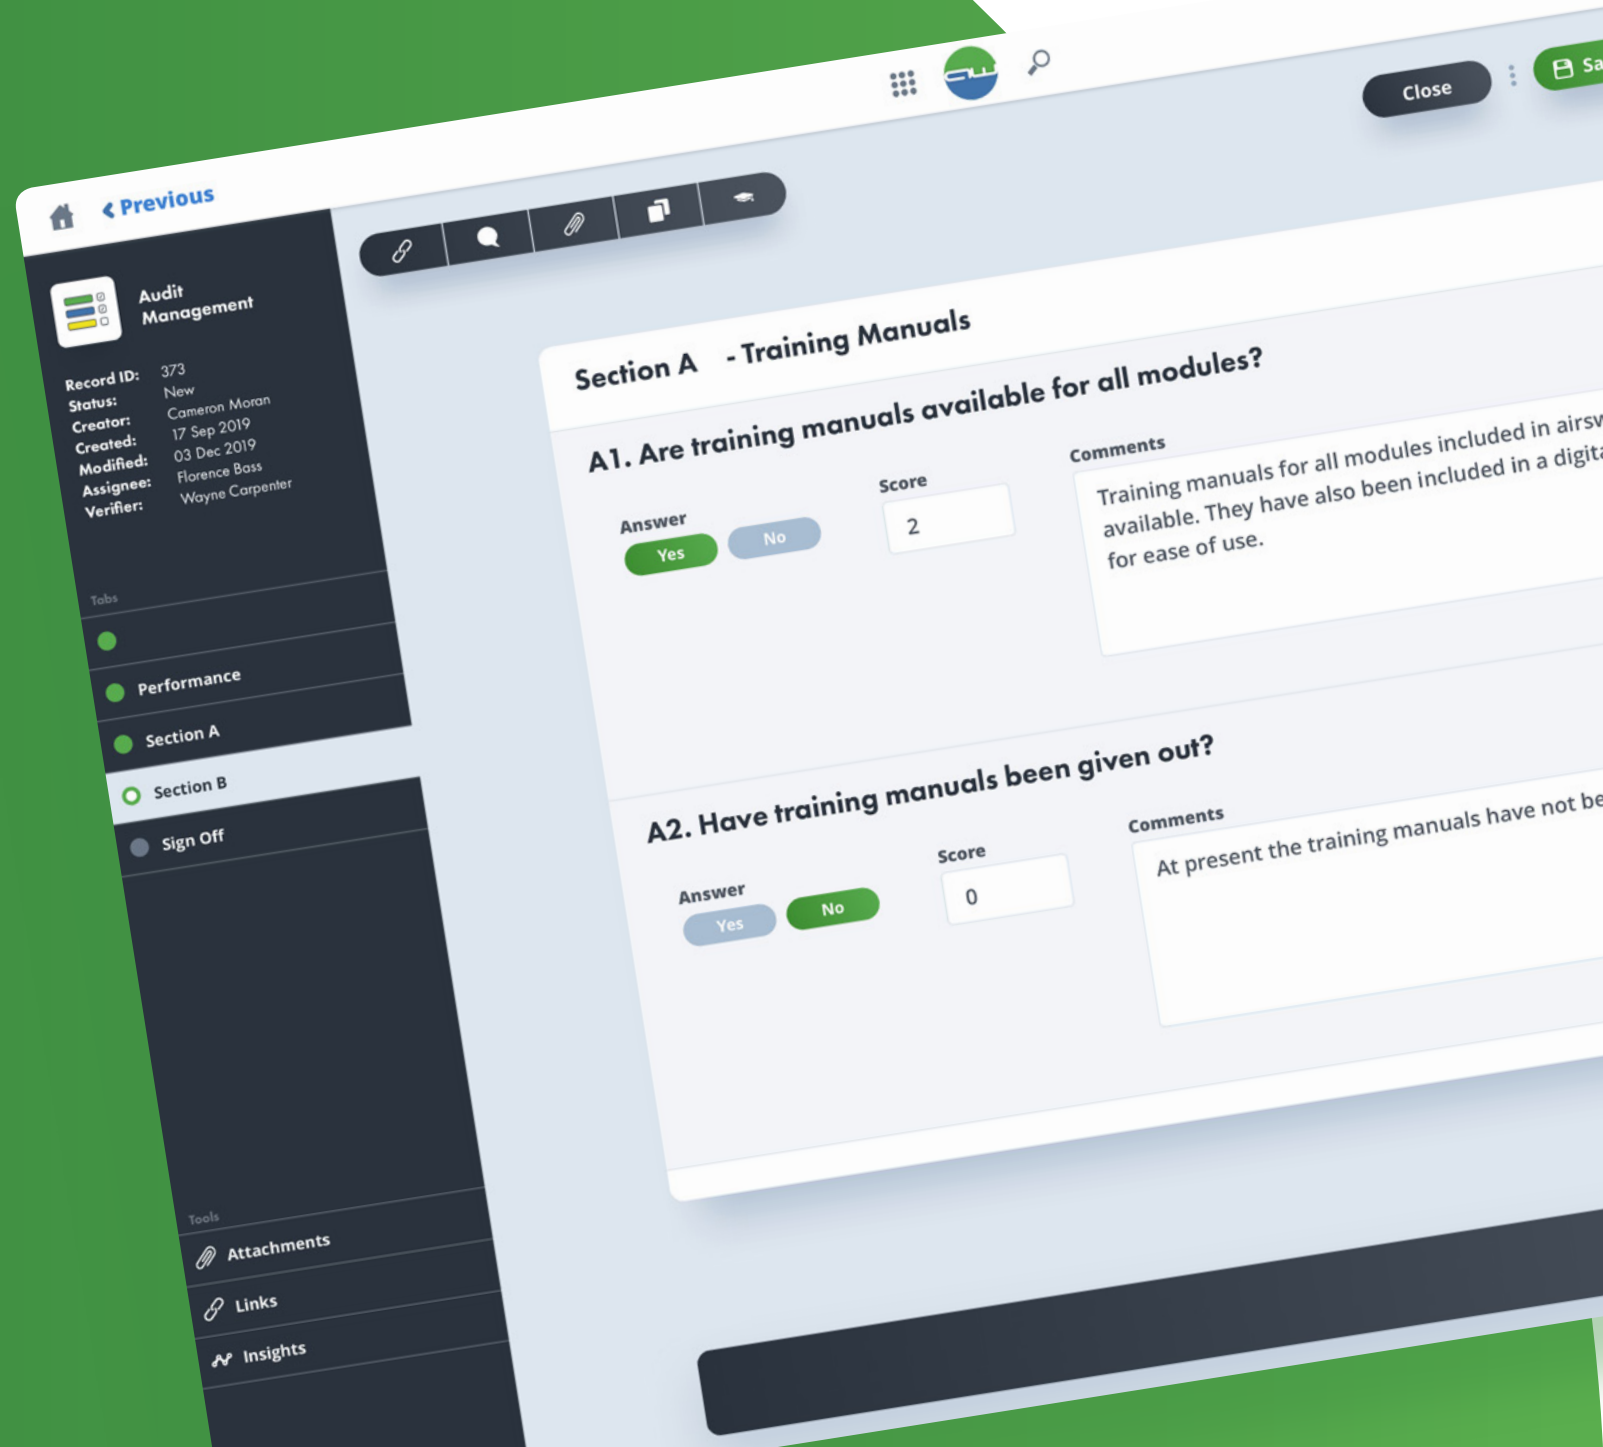

- Assign actions based on non-conformances
- Set automated action reminders
- Use custom approval workflows

Analyse Results

- Establish patterns and common non-conformances
- Visualise data as tiles or best practice graph styles
- Create audit-specific dashboards
- Share dashboards with any other AVA user

Audit Library

- Create a library of tailored audit templates
- Access pre-loaded best-practice audit templates
- Users will only see data that is relevant to their position
