Frictionless Reporting

Remove barriers. Increase reporting. Exponentially increase data capture to make better safety decisions.

- *Mobile first approach to event reporting*
- *No downloads required*
- *Artificially intelligent chatbots*
- *Ensure essential information is collected*

Remove Barriers to Reporting

One of the primary reasons events go unreported is that the administrative burden is too high to report them. Our frictionless reporting concept removes virtually all of those barriers.

We use existing technology - so there is nothing to download, no need to create an account and no learning curve. We simplify the process - events can be reported in as little as 20 seconds.

No barriers. No excuses.

Collect Essential Data - Every Time

Traditional event reporting channels are open to human error. Essential details can be missed or misreported. Our frictionless reporting technologies put a stop to that. We leverage artificial intelligence chatbots that understand the importance of capturing location, date, time and event details.

Ok, I understand. Tell me what happened... 10:12 am

A warehouse lift operator was hit by falling items. 10:33 am ✓✓

Key Benefits

Report in Seconds

Frictionless Reporting channels can remove any time barriers to incident reporting. Incidents can be reported in as little as 20 seconds improving efficiency throughout your organisation.

Channels that Work for You

With a range of channels and mediums available, our frictionless reporting solutions are perfect for your existing corporate technology stack. Use SWIFT responsive web app, SMS, WhatsApp or even Microsoft Teams.*

No Download Required

With a range of applications available, frictionless reporting can work within the confines of your corporate IT infrastructure. There are no apps to download for many of our channels, and for the channels that do require a download - such as WhatsApp or MS Teams - they are applications your fringe users will already be familiar with.

Anonymous (if needed)

Frictionless reporting is all about massively increasing the amount of data available to you. This means it can be anonymous to protect the identity of the reporter.

* MS Teams
