# Covid-19 Tracker

**Report, record and analyse the impact across your workforce and sites - in real time!**

AVA's dedicated COVID-19 Tracker module empowers you to instantly identify if any hot-spots start to appear with your most valuable asset – your people. Implementing effective preventative measures to minimise the spread of COVID, or any other pandemic, is just one of the vital actions a company needs to take. Timely COVID related evidence and investigation can empower you to plan, forecast and prevent further spread.

Lockdown, self-isolation and shielding have been part of our daily conversation over the last 6 months and will likely be for some time – unfortunately, so find out how the COVID-19 Tracker can help you maintain a safe working environment and support your business continuity.

## Identify Hot Spots Fast

Tracking the impact of COVID is paramount to help avoid further spread and enable you to protect your workforce. The COVID-19 Tracker allows you to quickly and easily record COVID cases and immediately identify 'hot spots', so that corrective actions can be put in place reducing negative impact on your company and its personnel.

## Configure Your COVID Module

With continual government updates and as we all learn more about COVID and the latest symptoms, source of infections and tracking guidance you can configure the module to be relevant to your company's experiences and procedures.

All AVA modules have the flexibility to be configured to meet your business requirements as they change.

## Key Benefits

- Gain visibility of covid and the impacts to your business.
- Make decisions on real time cases and sources of infection to reduce the outbreak
- Quickly and easily record a suspected or confirm COVID case using the simple form layout - immediately track cases and identifying the potential causation.

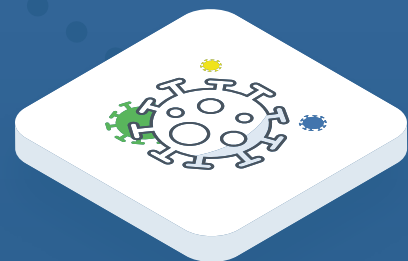

# Key Features

- Quickly and easily record and track COVID-19 incidents and receive real time automated Action and Email notifications.
- Schedule daily reporting outputs to maximise effective monitoring and implement rapid changes in processes, environment and key messages.
- AVAs dynamic dashboards provide 'at a glance' intelligence on the COVID impact enabling you to react to potential supply chain issues, identify work force skill shortages and monitor the business impact.
- Easily screen infection sources recorded and staff isolation periods to help with workflow planning.
- Increase user reporting at all levels where mobile technology is permitted.
- AVA COVID-19 Tracker charts enable you to access and analyse the granular detail fast. You can change the axis daily and enable your business to be reactive to constant changes.

## User Engagement Success

- Installing Google Maps enables you to visually see where incidents are occurring allowing you to implement immediate corrective action.
- Instant SMS Notifications alert workers of potential COVID risk which supports fast response action.
