

Former Bachelorette Becca Kufrin Chooses Renew Facial Plastic Surgery for Multiple Skincare Procedures

Minnesota native Becca Kufrin, known by her fans for winning *The Bachelor* season 22 and starring as the lead of *The Bachelorette* season 14, chose Renew Facial Plastic Surgery for multiple procedures to enhance and improve the look and feel of her skin.

Becca trusted the Renew staff, led by Dr. Justin Wudel and licensed aestheticians, to perform two procedures, including a facial rising in popularity – SkinPen® micro-needling with Platelet Rich Plasma (PRP), and Broadband Light (BBL™) treatment.

She shared her experiences undergoing both procedures with her 1.3M followers on [Instagram](#). “This facial is putting your own plasma on your face, and then having an aesthetician micro-needle it in... it’s supposed to make you look more youthful and rejuvenated,” said Becca of the SkinPen® with PRP. During the first stage of the procedure, Becca explains how the plasma is separated from the blood using a centrifuge, which is then applied using a micro-needling process.

Using a natural remodeling process, the SkinPen® with PRP stimulates skin repair and is designed to fight against fine lines, wrinkles, large pores, uneven skin texture, and acne scars. Procedures take just 30 minutes and are perfect for all types of skin. Results may vary and those interested in the procedure should speak with their doctor.

BroadBand Light technology utilizes the world’s most powerful IPL (Intense Pulsed Light) method. Becca underwent Forever Young BBL™ treatments to repair skin damage from exposure to the sun. “I had a ton of freckles,” Becca said. Treatments helped Becca’s skin look clearer, smoother, and younger.

Renew Facial Plastic Surgery is located in Edina, Minnesota and serves the greater Minneapolis and Saint Paul areas. “You should check out Renew if you are in dire need of a facial,” Becca said. She encouraged her followers to explore options with Renew Facial Plastic Surgery, offering 20% off their first treatment by stating “I want Becca’s discount.”
