

# Delivering life-changing healthcare solutions

My name is Andrew Cameron and I am a highly experienced commercial project leader with over 20 years' healthcare experience looking for opportunities in digital health where I can make a difference.

I have helped a range of organisations across the private sector and government agencies, from early start ups through to market leading corporates. I have led delivery of successful projects in product & service development and launch, digital programme transformation, business transformation and healthcare service redesign. Now Wellington and NZ based, my international experience extends to the UK and Australia with a truly global network.

Throughout I have been struck by the dramatic range of healthcare experiences faced by people today. At the same time, I have been fortunate to work directly with or partner a number of digital health solutions that have been able to transform the experience people receive in access to, or delivery of their healthcare. I have now developed specialist experience in taking ideas from conceptual to commercial.

If you would like to discuss how I can help you achieve your business goals please feel free to contact me directly on 021 085 33539, or email at [andrewncameron@hotmail.com](mailto:andrewncameron@hotmail.com)
