

NZ HEALTHTECH OPPORTUNITIES REPORT

FULL TECH ENABLEMENT TO ACHIEVE A WORLD CLASS HEALTH, DISABILITY AND SOCIAL SYSTEM FOR EVERYONE LIVING IN NEW ZEALAND

We must achieve:

- A positive, united & collaborative call to action that is opportunities focussed & identifies key challenges preventing or slowing progress (turning talk into action)
- Define a clear direction of travel (vision) for at least the next 5 years, focus our combined efforts as a strong, relevant & influential body - have a clear message of how we'll play our part to contribute to achieving full tech enablement
- A national & international plan for growth that benefits NZ – national health outcomes benefitting from a stronger export sector

CALLS TO ACTION BECOME THE TERMS OF REFERENCE FOR THE ACTION GROUPS – THE REPORT IS NOT THE END GAME

NZ HEALTHTECH OPPORTUNITIES REPORT

PROGRESS SO FAR –

- Engagement sessions in September
- Workstreams established and now in action –
 - Te Tiriti o Waitangi – “The room we sit in”
 - The Wellbeing Approach – Social Determinants, Living Standards Framework
 - Digital Economy – ‘It’s all about People’ - Workforce of the Future, Change Management, Literacy
 - Innovation and Export – growing the sector to benefit all New Zealanders
 - Covid-19 Effect – Locking in the Gains
 - Investment in the Future - \$\$ are important but not the only thing that needs to change
 - Digital Enablers – the platforms, infrastructure, standards, stability and consistency
- Get involved –
 - It’s inclusive and you can engage at whatever level works best for you
 - But don’t stand on the sidelines – now is the time for action
 - Speak to Scott, any of the NZHIT Board members or report partners/supporters

The Headcount Paradigm

The Health, Disability and Social Sector problem definition:

“More People Needing Even More Care”

The solution is repeatedly defined as:

“More People to Provide More Care”

What do we get if we keep doing what we’ve always done for the last 20 years:

The Headcount Paradigm!

The solution is the problem and tech has the ability to change the paradigm

Not by replacing the carers

by enabling them to do what they do best

by getting ahead of the demand curve

The challenge is to describe a new solution so it breaks the chain of the current paradigm’s grip on the country

Up for the challenge?

Then get connected, informed and engaged in the NZ HealthTech Opportunities Report
