

RISK ASSESSMENT

Name of Academy: Christ Church Upper Armley		Date of assessment: 25.1.21				
Assessment carried out by: S. C and N. M		Review date: 22.2.21				
Activity / Task: Mass Asymptomatic Testing for Primary and Nursery settings						
Area of Control	Ref	Control Measures	What further action is necessary?	Action by who?	Action by when?	Done
PT1. Organising the testing system.	1.1	<p>Virtual staff meeting(s) undertaken to give a consistent message regarding the testing process and to provide staff with:</p> <ul style="list-style-type: none"> the school amended letter for staff and privacy notice (on the Primary school's portal) information leaflet time to watch the how to test video access to the relevant materials on the primary school's portal to enable them to make an informed decision regarding consent for weekly testing. <p>Time give during and after staff meeting for staff to ask questions / raise any issues or concerns.</p>	Staff meeting 27.1.21 NM	NM	27.1.21	27.1.21
	1.2	<p>Staff informed that if they consent to testing they must:</p> <ul style="list-style-type: none"> carry out the testing at the time agreed with the school follow the instructions in the test kit upload their results inform the school as soon as possible <p>Staff informed they must not:</p> <ul style="list-style-type: none"> give the test kits to anyone else 				
	1.3	<p>Records kept as to which staff have given consent to carry out twice weekly testing.</p> <p>Staff have been encouraged to undertake testing as it is an additional control measure on top of those already in place in school, however, consent is voluntary and can be withdrawn by the individual at any time and no-one has been directed to or forced to take the tests.</p>				

RISK ASSESSMENT

	Staff attending school who do not consent to the test can still attend school as normal if they do not have symptoms of Covid - 19.				
1.4	A system of recording the distribution of test packs and the results of testing carried out is in place.	N. M set up spreadsheet	NM	25.1.21	
1.5	COVID-19 co-ordinators have been identified The role this person will carry out has been identified and include :				
	a) who is communicating with staff and addressing any personal issues / concerns with regards to testing they may have.				
	b) who is distributing the correct number of kits to staff, ensuring staff have the right instructions and are signing for the test kits.				
	c) who is the point of contact for staff if they have incidents whilst testing at home and who is reporting any incidents and overseeing the process. The incident form in the "How to Guide - Primary Schools EY LFD Testing" document could be used.				
	d) who is receiving, recording and collating tests results including reporting any positive results to DCS Alert via the PCIF 01 form.				
	e) who is managing the storage, stock control and re-ordering of test kits.				
1.6	Staff undertaking testing have been made aware of who has responsibility for each of the roles within section 1.5 so they can report results and raise any issues / questions with the appropriate person.				

RISK ASSESSMENT

	1.7	A collection point has been set-up in school for the distribution of the test packs. The space is big enough to allow social distancing for the numbers permitted to enter the space at any one time and is secured to prevent unauthorised access. The temperature of the area is between 2°C and 30°C.	SLT office will be used			
	1.8	The lot numbers of the testing kits provided have been recorded on arrival.				
PT 2. Storage and management of Testing Materials / Supplies for the Testing area.	2.1	Testing kits should be stored between 2°C and 30°C.				
	2.2	Storage areas should be lockable and access restricted to authorised personnel only.				
	2.3	Checks of supplies should be regularly undertaken to ensure there are adequate supplies of all relevant materials for the testing to be undertaken and stocks re-ordered as required.				
PT 3. Issuing tests	3.1	Tests have only been offered to staff who attend the school setting and not those working from home. Staff are expected to sign for the receipt of their test kits. If you have regular contracted staff on site e.g. cleaners and caterer's you could include them in your testing offer the amount of kits you have been provided with allows for this. This would need to be done in consultation with the contractor's managers and test results would need to be shared between both parties. Those staff would be expected to follow the same procedures as your own staff.				
	3.2	If you have <i>regular</i> contracted staff, therapists, volunteers on site e.g. cleaners and caterers, peripatetic teachers etc. you could include them in your testing offer if the amount of kits you have been provided with allows for this. This would need to be done in consultation with the contractors / managers and test results would need to be shared between both parties. Those persons would be expected to follow the same procedures as your own staff.				

RISK ASSESSMENT

	3.3	All staff consenting to testing should test twice a week as the tests work best when there is a high viral load. This will apply to part time and full time staff.				
	3.4	Staff have been given time slots for the collection of their test kits to avoid staff congregating in the area. Staff distributing / collecting test kits must wear face masks / face coverings, maintain a 2m distance and hand sanitise before / after handling kits.				
	3.5	When issuing test kits the issuer must complete the test kit log - see record keeping below.				
	3.6	Test kits have been issued with the most up to date Instructions for Use leaflet (at this current time test kits may not have the most up to instructions included). Staff have also been sent a copy of this electronically and it is placed on the schools shared drive so staff can still access the instructions if they lose the leaflet.				
PT 4. Conducting the Tests	4.1	Tests should be taken twice a week at intervals of 3 or 4 days apart e.g. Sunday and Wednesday or Thursday. Set days have been identified for staff to undertake their tests. One of the days is the first day they are in school each week / the day before. <i>This may mean the same set day for all staff or different set days depending on the working patterns of staff.</i>				
	4.2	The time for undertaking the test is in the morning to minimise the chance of being exposed to Covid19 after taking the test to enable time for the school to take action re close contacts / manage absences in the event of a positive LFT and for staff to have the time to re-take a test if they get void results.				
	4.3	Staff that have had a positive PCR test in the last 10 days should not take a LFD test in the 10 day period after the PCR test. Staff can resume Lateral flow testing on their return from isolation. Staff that have had the Covid-19 vaccine can still take part in the LFT programme.				

RISK ASSESSMENT

	4.4	The LFD test kits should be stored between 2°C and 30°C. However the devices and reagents must be used between 15 °C and 30 °C during use so if they are stored somewhere colder than 15 °C they should be moved to a room temperature area for around 30 minutes before use.				
	4.5	Staff should				
		a) wait at least 30 minutes after eating or drinking anything before starting the test.				
		b) Not start their test if they have had a nosebleed in the last 24 hours - if this is the case they should inform school and take a test when the 24 hours has elapsed if possible bearing in mind the need to take the 2 tests 3 / 4 days apart. If only one nostril has bled they can swab the other one.				
		c) Swab the other nostril if they have a nose piercing or, if both nostrils are pierced, remove the jewellery first.				
		d) Swab both nostrils if they cannot take a throat swab e.g. they have had a tracheostomy.				
		e) Wash their hands or hand sanitise before taking the test.				
		f) Use a clean, flat surface and, if doing more than one test, make sure they sanitise their hands each time.				
	g) Time the test and check their results at the 30 minute point as tests results are invalid if left any longer.					
	4.6	If a test result is Inconclusive / Void the individual should take another LFT as soon as possible using a new test kit but not reusing anything from the first kit. If both tests are void the member of staff should arrange to have a PCR test.				
4.7	The testing solution is not toxic in the quantities provided and any spillages should be cleaned with a paper towel.					
4.8	As soon as possible after a positive or negative result staff should upload their results to the NHS online at www.gov.uk/report-covid19-result or by contacting 119. They must also inform the school via the identified route / at the identified time.					

RISK ASSESSMENT

	4.9	Staff should report any issues with testing to the school e.g. unable to take the test, missing / broken / damaged items, unable to log results with NHS, void results. The school can monitor and / or then raise this with DfE helpline or 119 as identified in the How to Guide page 17.				
PT 5. Test results and actions to take	5.1	Positive result - individual and their household should start self isolation straight away and the individual should get a PCR test to confirm the result.				
	5.2	Only a very small proportion of people who do not have coronavirus will receive a positive result (false positive) from a LFT. For this reason household contact isolation and the tracing and isolation of close contacts of the positive case should take place at the point of a positive LFT and should not wait for the PCR test result.				
	5.3	If the PCR test is negative the individual, household and close contacts can end isolation unless they have symptoms of Covid 19.				
	5.4	Negative result - individual and household can continue as normal unless they have symptoms of Covid-19.				
	5.5	Inconclusive / Void result the individual should take another LFT as soon as possible using a new test kit but not reusing anything from the first kit. Relevant action will then be taken when a positive / negative result is obtained. If both tests are void the member of staff should arrange to have a PCR test.				
PT 6. Record keeping / Reporting.	6.1	Schools keeps records of: a) the consent forms and any withdrawal of consent b) the test kits distributed (a test kit log) and including staff signatures on collection c) their own records of the results of tests.				
	6.2	Records are kept in accordance with GDPR requirements. The test results register should be kept for a month after the last entry.				
	6.3	The test kit log and the test results register / log are separate documents.				

RISK ASSESSMENT

	6.4	The test kit log should be kept for no longer than five days after the test kit is provided. The test results register should be kept for a month after the last entry.				
	6.5	All positive results (even where a confirmatory PCR test is negative) should be reported as usual via the MAT PCIF 01 Form saved within AbbeyTrustShares				
PT 7. Waste Disposal	7.1	Tests can be disposed of in the waste bags provided in the test kit and then put in with the general household waste.
