

Junior Web Developer Contractor

Posted 4/1/2021; updated 4/16/2021.

Tony Britt Spotter Charts seeks to contract a remote, part-time, self-driven, & motivated Junior Web Developer interested in growing their skill set & gaining professional experience.

- Take on a variety of interesting improvements, problems, & maintenance of existing technology solutions that drive our growing business that serves top sports broadcasters on TV, radio & internet with ESPN, Fox Sports, pro & college teams, et.al.
- Work on your own schedule remotely, & be able to contribute 20-40 hours a week.
- Solve problems with critical thinking, capable of tackling small to large tasks on your own, but also not afraid to ask for help when necessary.
- Demonstrate your history of prior job experience, educational courses, &/or self-taught & self-directed projects, the skills outlined below, though we are open to applicants lacking some technical skills.

Desired Skills & Proficiencies

- Object Oriented Programming, any language. Ruby is a plus.
- Experience (professional or self-taught) with any full-stack web development.
 - Frontend: HTML, CSS, & some Javascript
 - Backend application development (REST, MVC)
 - Familiarity with Ruby on Rails is a plus but not required.
 - Familiarity with server technologies (ubuntu, nginx, etc) is a plus but not required.
- Experience (professional or self-taught) with relational databases (MySQL)
- Knowledge & interest in sports & sports data is a plus, but not required.
- Excellent organizational skills & attention to detail.
- Excellent time management skills.
- Professionalism & integrity.
- An open mind, with a strong desire to learn & grow.

Requirements:

- Must have their own, reliable equipment, capable of developing web technologies.
- Minimum 20 hours/week, maximum 40 hours/week.
- Begin ASAP through summer 2021, with long-term opportunity.

Interested applicants should email a cover letter & resume/CV to contact@spottercharts.com.
